

ISO 23795-2:2024-02 (E)

Intelligent transport systems - Extracting trip data using nomadic and mobile devices for estimating CO₂ emissions - Part 2: Information provision for eco-friendly driving behaviour

Contents		Page
Foreword		iv
Introduction		v
1 Scope		1
2 Normative references		1
3 Terms, definitions and abbreviated terms		1
3.1 Terms and definitions.....		1
3.2 Abbreviated terms.....		2
4 General information		2
4.1 Purpose of information provision for eco-friendly driving behaviour.....		2
4.2 Overview of use cases.....		3
4.3 Functional requirement.....		3
5 Use cases definitions		3
5.1 Overview.....		3
5.2 UC 1: Speeding.....		3
5.3 UC 2: Long speeding.....		4
5.4 UC 3: Sudden acceleration.....		5
5.5 UC 4: Sudden start.....		5
5.6 UC 5: Sudden deceleration.....		6
5.7 UC 6: Sudden stop.....		7
5.8 UC 7: Idling.....		7
5.9 UC 8: Fuel-cut.....		8
5.10 UC 9: Economical driving.....		9
6 Datasets definitions		10
6.1 Overview.....		10
6.2 Data type.....		10
6.3 Datasets definitions in use cases.....		10
6.3.1 UC 1: Speeding.....		10
6.3.2 UC 2: Long speeding.....		10
6.3.3 UC 3: Sudden acceleration.....		11
6.3.4 UC 4: Sudden start.....		11
6.3.5 UC 5: Sudden deceleration.....		12
6.3.6 UC 6: Sudden stop.....		12
6.3.7 UC 7: Idling.....		13
6.3.8 UC 8: Fuel-cut.....		13
6.3.9 UC 9: Economical driving.....		14
