# ISO 24650:2024-09 (E)

## Road vehicles - Sensors for automated driving under adverse weather conditions - Assessment of the cleaning system efficiency

## Contents

Page

Foreword ..... iv

Introduction ..... v

1 Scope ..... 1

2 Normative references ..... 1

3 Terms and definitions ..... 2

4 Principle of the cleaning efficiency assessment ..... 2

5 General testing conditions ..... 5
5.1 Installation ..... 5
5.2 No-load cleaning cycle ..... 5
5.3 Surface contamination ..... 5
5.4 Environmental conditions ..... 5
5.5 Sensor surface state preparation ..... 6
5.5.1 Pre-cleaning ..... 6
5.5.2 Surface tension ..... 6
5.6 Lighting conditions ..... 7
5.7 Camera and shooting conditions ..... 7
5.8 Specific situations ..... 7
5.8.1 Sensor surface ..... 7
5.8.2 Cleaning system ..... 7
5.9 Test session ..... 7

6 Dust/mud testing ..... 7
6.1 Test mixture preparation ..... 7
6.2 Test equipment ..... 8
6.3 Preparation of the equipment ..... 8
6.4 Test procedure ..... 8

7 Frost/ice testing ..... 11
7.1 Frost/ice preparation ..... 11
7.2 Test equipment ..... 11
7.3 Preparation of the equipment ..... 11
7.4 Test procedure ..... 11

8 Mist/rain testing ..... 12
8.1 Water specification ..... 12
8.2 Test equipment ..... 12
8.3 Preparation of the equipment ..... 12
8.4 Test procedure ..... 13

9 Assessment of the efficiency of the cleaning system ..... 13
9.1 Picture analysis ..... 13
9.2 Cleaning system efficiency calculation ..... 14
9.3 Specific areas of interest ..... 14
9.4 Expression of results ..... 14

**Annex A (informative) Selected washer fluids ..... 16**

**Annex B (informative) Examples of standard dusts ..... 17**

**Annex C (informative) Examples of picture analysis ..... 18**

**Annex D (informative) Example of iterative threshold determination ..... 19**

**Annex E (informative) Areas of interest depending on sensor type and geometry ..... 20**

**Bibliography ..... 21**
