

ISO/TR 15497:2000-11 (E)

Road vehicles - Development guidelines for vehicle based software

| Contents | | Page |
|-----------------|--|-------------|
| 1. | Introduction..... | 1 |
| 1.1 | Statement of mission and objectives | 1 |
| 1.2 | Benefits to the end customer..... | 1 |
| 1.3 | The MISRA consortium..... | 1 |
| 1.4 | Background..... | 2 |
| 1.5 | Scope and uses of the Guidelines..... | 3 |
| 1.5.1 | Scope..... | 3 |
| 1.5.2 | Uses | 3 |
| 1.6 | Fundamental concepts | 5 |
| 2. | Definition of terms..... | 7 |
| 2.1 | Definitions | 7 |
| 2.2 | List of abbreviations | 7 |
| 3. | Software lifecycle | 8 |
| 3.1 | Project planning | 8 |
| 3.1.1 | Project definition | 8 |
| 3.1.2 | Lifecycle plans..... | 9 |
| 3.1.3 | Planning for verification and validation..... | 9 |
| 3.1.4 | Assessment | 13 |
| 3.1.5 | Reuse..... | 14 |
| 3.2 | Integrity | 14 |
| 3.2.1 | Introduction..... | 14 |
| 3.2.2 | Safety analysis..... | 15 |
| 3.2.3 | Human factors in safety analysis | 18 |
| 3.2.4 | Development approaches..... | 19 |
| 3.3 | Requirements specification | 22 |
| 3.3.1 | Whole vehicle architecture..... | 22 |
| 3.3.2 | Vehicle control systems | 25 |
| 3.3.3 | Noise and electromagnetic compatibility | 28 |
| 3.3.4 | Verification and validation of software requirements | 30 |
| 3.3.5 | Tools and techniques for requirements specification..... | 32 |
| 3.4 | Design..... | 33 |
| 3.4.1 | Real-time implications | 33 |
| 3.4.2 | Floating point arithmetic | 36 |
| 3.4.3 | Modelling..... | 37 |
| 3.4.4 | Optimization and adaptive control | 38 |
| 3.4.5 | Communications and multiplexing..... | 38 |
| 3.4.6 | On-board diagnostics | 41 |
| 3.4.7 | System security..... | 43 |
| 3.4.8 | Fault management..... | 43 |
| 3.4.9 | Design for verification and validation | 45 |
| 3.4.10 | Tools and techniques for design | 46 |
| 3.5 | Programming | 47 |
| 3.5.1 | Codes of practice | 47 |
| 3.5.2 | Verification and validation of code..... | 48 |
| 3.5.3 | Programming tools and techniques | 48 |
| 3.6 | Testing..... | 49 |
| 3.6.1 | General | 49 |
| 3.6.2 | Dynamic test | 49 |
| 3.6.3 | Integration test..... | 49 |
| 3.6.4 | System test | 51 |
| 3.6.5 | Tools and techniques for testing..... | 51 |
| 3.7 | Product support..... | 52 |
| 3.7.1 | Off-board diagnostics | 52 |

| | | |
|-------|---|----|
| 3.7.2 | Software maintenance..... | 53 |
| 4. | Software quality planning | 55 |
| 4.1 | Management responsibilities | 55 |
| 4.2 | Education and experience | 56 |
| 4.3 | Human factors in software development | 56 |
| 4.3.1 | Introduction | 56 |
| 4.3.2 | Teams and organizational structure | 57 |
| 4.3.3 | Individual differences and job design | 57 |
| 4.3.4 | Human error management | 58 |
| 4.3.5 | The physical environment | 58 |
| 4.4 | Quality assurance | 59 |
| 4.4.1 | Standards and accreditation | 59 |
| 4.4.2 | Checklists | 59 |
| 4.4.3 | Assessment of compliance | 59 |
| 4.4.4 | Changes during production..... | 60 |
| 4.4.5 | Software process metrics | 60 |
| 4.5 | Documentation requirements..... | 62 |
| 4.6 | Subcontracting | 63 |
| 4.6.1 | Introduction | 63 |
| 4.6.2 | Definitions | 63 |
| 4.6.3 | Technical considerations..... | 65 |
| 4.6.4 | Commercial considerations..... | 67 |
| 5. | Emerging technologies | 70 |
| 5.1 | General..... | 70 |
| 5.2 | Neural networks | 70 |
| 5.3 | Object orientation | 71 |
| 5.4 | Fuzzy logic..... | 71 |
| 5.5 | Formal mathematical methods..... | 72 |
| 6. | References..... | 73 |
| 7. | Index..... | 76 |
