## Intelligent transport systems - Information interface framework between automated driving systems and users

---

| <b>Contents</b>    |  | <b>Page</b> |
|--------------------|--|-------------|
| Foreword .....     |  | iv          |
| Introduction ..... |  | v           |
| 1                  | <b>Scope</b> .....   | 1           |
| 2                  | <b>Normative references</b> .....                            | 1           |
| 3                  | <b>Terms and definitions</b> .....                           | 1           |
| 4                  | <b>Abbreviated terms</b> .....                               | 1           |
| 5                  | <b>System image</b> .....                                    | 1           |
| 6                  | <b>Classification of the information in ADS</b> .....        | 2           |
| 6.1                | <b>General strategy for information classification</b> ..... | 2           |
| 6.2                | <b>Fallback cases</b> .....                                  | 2           |
| 6.3                | <b>Direction of the information</b> .....                    | 4           |
| 6.4                | <b>Criticality assessment</b> .....                          | 5           |
| 6.4.1              | <b>General</b> .....   | 5           |
| 6.4.2              | <b>Information from ADS to user (A)</b> .....                | 5           |
| 6.4.3              | <b>Information from user to ADS (B)</b> .....                | 6           |
| 6.5                | <b>Classification of information</b> .....                   | 8           |
| 6.6                | <b>Priority of information transmission</b> .....            | 9           |
| Bibliography ..... |  | 10          |
