ISO/PAS 23735:2025-03 (E)

Road vehicles - Ergonomic design guidance for external visual communication from automated vehicles to other road users

Contents

Page

Foreword ..... **v**

Introduction ..... **vi**

1 Scope **1**

2 Normative references **1**

3 Terms and definitions **1**

4 Historical perspective on the interaction between road users **4**
4.1 General 4
4.2 Road sharing 4
4.3 History of external communication systems 5

5 Current and future challenges in road user interaction **6**

6 Framework for interaction **7**
6.1 General 7
6.2 Encounter, interaction and conflict 7

7 Communication channels **8**
7.1 General 8
7.2 Communication as a negotiation 8
7.3 Considerations for implicit signalling 8
7.4 Integration of implicit and explicit signals 9

8 Expectation of other road users **10**
8.1 General 10
8.2 Acceptance/acceptability of new technology 10
8.3 Expectations for perception, comprehension and behaviour 11
8.3.1 Expected influence on road users' perception 11
8.3.2 Expected understanding upon exposure 11
8.3.3 Expected influence on road users' behaviour 11
8.4 Cultural and regional considerations 13
8.5 Demographic factors 13
8.5.1 General 13
8.5.2 Age 13
8.5.3 Gender 15
8.5.4 Disabilities 15

9 Developing a communication language **16**
9.1 General 16
9.2 General communication needs 17
9.3 Communication protocols 17
9.4 Content selection, media allocation, realization and coordination 18
9.5 External communication language considerations 18

10 Regulatory and standards considerations **20**

11 Implementation guidance **21**
11.1 General 21
11.2 Message content 21
11.2.1 Coordination with vehicle motion 21
11.2.2 Learnability 21
11.2.3 Addressability 22

11.3 Visual attributes 22
11.3.1 General 22
11.3.2 Presentation style 22
11.3.3 Location 22
11.3.4 Angle of view 23
11.3.5 Colour 23
11.3.6 Brightness 24
11.4 Integration with existing systems 24
11.4.1 Coordination and choreography with other signals 24
11.4.2 Discussion on integration with automated driving system 24
11.5 Evaluation 24
Annex A (informative) **Use cases in traffic situations with need of communication** **25**
Annex B (informative) **Description of the multiple resource theory** **48**
Bibliography **50**
