Foreword iv

Introduction v

1 Scope 1

2 Normative references 1

3 Terms,definitions and abbreviated terms 1
3.1 Terms and definitions 1
3.2 Abbreviated terms 2

4 Introduction of DBIS 2
4.1 Ego-vehicle's DBIS 2
4.2 Driver's intention 4
4.2.1 General 4
4.2.2 Intention of longitudinal control 4
4.2.3 Intention of lateral control 4
4.2.4 State of driver 4
4.3 Status of vehicle 4
4.3.1 Speed of vehicle 4
4.3.2 Distance of vehicles 4
4.3.3 Vehicle type 4
4.3.4 Vehicle location 4
4.4 Road-environment information 5
4.4.1 Traffic property of road 5
4.4.2 Additional property of road 5
4.5 Egocentric surrounding object's information 5
4.6 Related messages 5
4.6.1 Collection of DBIS 5
4.6.2 Sharing DBIS 5
4.7 Functional components 6

5 Use case overview and principles 7
5.1 Basic principles for use case definition 7
5.2 Overview of collective perception 7
5.3 Overview of learning to predict and assess collision risk 8
5.4 Use case clusters 9

6 Usecasedefinition 10
6.1 Overview 10
6.2 UC cluster 1 - Collective perception 10
6.2.1 UC 1.1 - Sharing the intention of an ego vehicle to make lane change 10
6.2.2 UC 1.2 - Situation perception of cut-in/cut-out of adjacent vehicles 11
6.3 UC cluster 2 - Learning to predict and assess collision risk 12
6.3.1 UC 2.1 - Collision prediction if vehicle suddenly attempts to enter left/right lane 12
6.3.2 UC 2.2 - Situation awareness of the collision with speed-up straight-ahead vehicle when vehicle attempts to change lane 13
6.3.3 UC 2.3 - Assessment of driving method when all vehicles ahead suddenly slow down 14
