ISO/TS 4654:2025-07 (E)

Road vehicles - Advanced automatic collision notification (AACN) systems - Methodology for creating and validating algorithms for injury level prediction

Contents

Page

Foreword iv

Introduction v

1 Scope 1

2 Normative references 1

3 Terms and definitions 1

4 AACN injury severity prediction overview 3

5 Vehicle and road user data for injury prediction application 5
5.1 Introduction 5
5.2 Vehicle-related input parameters 6
5.3 Vehicle occupant-related input parameters 6
5.4 Vulnerable road user data 7

6 Injury prediction algorithm development 8
6.1 General 8
6.2 Applicability of retrospective data for AACN use 8
6.3 Modelling methods 8
6.3.1 Introduction 8
6.3.2 Example implementation of the logistic regression model for creating an injury risk curve 9
6.3.3 Alternative modelling methods 9
6.3.4 Important considerations for selecting model parameters 10

7 Recommendations on the metrics to validate injury prediction algorithms 10
7.1 Common performance metrics used to assess classification algorithms 10
7.1.1 General 10
7.1.2 Categorising outcomes from model prediction to enable performance assessment 10
7.1.3 Confusion matrix 11
7.1.4 Derived quantities used in assessing performance 11
7.2 Interpreting performance metrics using diagnostic curves in the context of AACN implementation 12
7.2.1 Introduction 12
7.2.2 Receiver Operator Curve 12
7.2.3 Precision recall curve 14
7.2.4 Effect of class imbalance on ROC and precision recall curves 14
7.2.5 Connection between ROC, PR curves and triage related terms 15
7.3 Summary of recommendations on performance metrics 17

8 Recommendation for monitoring the AACN algorithm 18
8.1 Overfitting 18
8.1.1 Overfitting risk 18
8.1.2 Approach for overfitting mitigation 20
8.2 Ensure the response of the algorithm to obvious physical variables 20
8.2.1 Analysis of relationships between variables and model response 20
8.2.2 Evidence of the algorithm response to obvious physical variables 23

9 Spatial and temporal validity 23

Annex A (informative) AACN algorithm research publications 24

Annex B (informative) Example implementation of the logistic regression model for creating an injury risk curve 34

Annex C (informative) Detailed processes involved in assessing the performance of AACN algorithms prior to implementation 36
