

DIN CEN ISO/TS 24315-3:2025-12 (E)

Intelligent transport systems - Management of electronic traffic regulations (METR) - Part 3: System of systems requirements and architecture (SoSR) (ISO/TS 24315-3:2025); English version CEN ISO/TS 24315-3:2025

Contents		Page
Foreword		v
Introduction		vi
1	Scope	1
2	Normative references	1
3	Terms and definitions	1
4	Abbreviated terms	1
5	Overview	2
5.1	METR purpose	2
5.2	METR scope	3
5.3	Management of electronic traffic regulations (METR) overview	3
5.3.1	Functional view	3
5.3.2	Physical view	4
5.4	Assumptions and dependencies	8
5.4.1	Assumptions	8
5.4.2	Dependencies	9
5.5	Traceability conventions	9
5.6	Naming conventions	11
5.7	Traceability and conformance	11
6	System of systems requirements	11
6.1	General	11
6.2	Input requirements	12
6.2.1	Information flow: legal rules	12
6.2.2	Information flow: coordination	12
6.2.3	Information flow: discrepancy information	13
6.2.4	Information flow: traffic control devices (TCD) status	14
6.3	Output requirements	15
6.3.1	Information flow: audit information	15
6.3.2	Information flow: coordination	16
6.3.3	Information flow: information	16
6.3.4	Information flow: information for adaptation	18
6.4	Functional requirements	20
6.4.1	Verification of METR rules	20
6.4.2	METR information storage requirements	20
6.5	Applicable intelligent transport system (ITS) station unit requirements	21
6.5.1	Support services	21
6.5.2	Timeliness	23
6.5.3	Filtering	23
6.5.4	Open specification	23
6.5.5	Backwards compatibility	24
6.5.6	Forward compatibility	24
6.5.7	Language neutral	24
6.6	Information requirements	24
6.6.1	General	24
6.6.2	Feature catalogue	24
6.6.3	METR information	24
6.6.4	Information content	25

6.6.5	Information meta-data	26
6.6.6	Observable transport rule attributes	26
6.6.7	Additional transport rule attributes	27
6.6.8	Auditing attributes	28
6.7	Efficient exchange constraint	28
7	Actor responsibilities	28
7.1	Rule maker responsibilities	28
7.1.1	Maintain rules	28
7.1.2	Define location accurately	28
7.2	User responsibilities	28
7.2.1	Acquire rules before travelling	28
7.2.2	Identify necessary rule criteria	28
7.2.3	Obtain necessary supporting data	28
7.2.4	Process rules	29
7.2.5	Identify discrepancies	29
7.2.6	Mapping	29
7.2.7	Determine user's location	29
7.2.8	Determine environmental conditions	29
7.3	Implementer responsibilities	29
7.4	Auditor responsibilities	29
8	System-level reference architecture	29
8.1	Overview	29
8.2	Physical view	30
8.2.1	Mapping to functional view	30
8.2.2	Centralized information distribution service package	31
8.2.3	Localized information distribution	36
8.2.4	Discrepancy management	40
8.2.5	Auditing service package	44
8.2.6	Service registration and discovery	46
8.2.7	Security enrolment and credentials management	47
8.2.8	Core authorization	48
8.2.9	System monitoring	49
8.2.10	Physical objects	50
8.2.11	Information flows	52
8.2.12	Cybersecurity overview	58
8.3	Enterprise view	59
8.3.1	Overview	59
8.3.2	Enterprise objects	63
8.3.3	Agreements and expectation definitions	70
8.3.4	Role definitions	73
8.3.5	Resources	73
9	Variables	74
9.1	General	74
9.2	catalogueUpdateInterval	74
9.3	criteriaLatencyTime	74
9.4	distributionResponseTime	74
9.5	informationRefreshDuration	74
9.6	metrRecoveryTime	74
9.7	metrResponseTime	75
9.8	metrUpdateCycle	75
9.9	metrUpTimePercent	75
9.10	provisionLatency	75
9.11	subscriptionRefreshTime	75
9.12	translationUpdateInterval	75
	Annex A (informative) Conformance	76
	Annex B (normative) Diagram conventions	78
	Annex C (informative) Possible deployments of role-based architecture	83
	Bibliography	93
