Information technology - City data model - Part 3: Service level concepts for transport

Contents

Page

Foreword iv

Introduction v

1 Scope 1

2 Normative references 1

3 Termsanddefinitions 1

4 Abbreviatedtermsandnamespaceprefixes 1

5 Conventions 2
5.1 Documentation format 2
5.2 Datatypes 3
5.3 Unique identifiers 3
5.4 Official URLs 3

6 Service-level ontologies for transport 4
6.1 General 4
6.2 Transport network pattern 4
6.2.1 Overview 4
6.2.2 Key classes and properties 4
6.2.3 Formalization 10
6.3 Road network pattern 12
6.3.1 Overview 12
6.3.2 Key classes and properties 12
6.3.3 Formalization 17
6.4 Rail network pattern 18
6.4.1 Overview 18
6.4.2 Key classes and properties 18
6.4.3 Formalization 22
6.5 Micromobility network pattern 22
6.5.1 Overview 22
6.5.2 Key classes and properties 22
6.5.3 Formalization 26
6.6 Pedestrian network pattern 27
6.6.1 Overview 27
6.6.2 Key classes and properties 27
6.6.3 Formalization 31
6.7 Travel corridor pattern 32
6.7.1 Overview 32
6.7.2 Key classes and properties 32
6.7.3 Formalization 34
6.8 Public transport system pattern 34
6.8.1 Overview 34
6.8.2 Key classes and properties 34
6.8.3 Formalization 38
6.9 Transport alert pattern 39
6.9.1 Overview 39
6.9.2 Key classes and properties 39

6.9.3 Formalization 41
