

ISO 6624-4:2003-10 (E)

Internal combustion engines - Piston rings - Part 4: Half keystone rings made of steel

| Contents | | Page |
|--------------------|---|-------------|
| Foreword | | iv |
| Introduction | | v |
| 1 | Scope | 1 |
| 2 | Normative references | 1 |
| 3 | Overview | 1 |
| 4 | Ring types and designation examples | 1 |
| 4.1 | Type HK -- Straight faced half keystone ring 7° | 1 |
| 4.2 | Type HKB -- Barrel faced half keystone ring 7° | 2 |
| 5 | Common features | 4 |
| 5.1 | Type HK and HKB -- Half keystone ring | 4 |
| 5.2 | Type HK and HKB rings -- Outside and inside rounded edges | 5 |
| 5.3 | Type HK and HKB rings (fully faced and inlaid) -- Plating/coating thickness | 6 |
| 5.4 | Type HK and HKB rings -- Nitrided case depth | 7 |
| 6 | Force factors | 8 |
| 7 | Dimensions | 8 |
