Foreword iv

Introduction v

1 Scope 1

2 Terms and definitions 1

3 Data collection for the priority index procedure 2
3.1 Appoint an examiner 2
3.2 Identify and assemble messages 3
3.3 Define driving context and situation 3
3.4 Select the evaluators 6
3.5 Evaluate criticality and urgency of a message 6
3.6 Instructions for the examiner 6
3.7 Alternative method for determining message priority 8

4 Data analysis for priority index 8
4.1 General 8
4.2 Select weights 8
4.3 Calculate priority pij 8
4.4 Calculate arithmetic mean and standard deviation of priority index across evaluators for each message 9
4.5 Calculate Pj and j 9
4.6 Determine priority order 9
4.7 Evaluate data quality 10

5 Application of results 10
5.1 Prioritization of priority ranking 10
5.2 How to deal with additional messages 10
5.3 Documentation 10
5.4 Other 10

Annex A (normative) Priority matrix method 11

Annex B (informative) System reaction matrix for priority matrix method 15

Annex C (informative) Rationale for recommended number of evaluators for priority index method 17

Annex D (informative) Example evaluator profile 20

Annex E (informative) Driving scenarios 21

Annex F (informative) Criticality and urgency as the evaluation criteria 23

Annex G (informative) Deriving weight kc and ku 24

Annex H (informative) Sample report format 25

Annex I (informative) "Acceptable" standard deviations j for priority indexes 26

Bibliography 28
