ISO 15830-3:2005-12 (E)

Road vehicles - Design and performance specifications for the WorldSID 50th percentile male side-impact dummy - Part 3: Electronic subsystems

Contents

Page

Foreword vi

Introduction vii

1 Scope 1

2 Normative references 1

3 Terms and definitions 1

4 Electrical subsystems requirements 2
4.1 Permissible sensors 2
4.1.1 General 2
4.1.2 Locations and specifications 2
4.1.3 Sensor specifications and mass 3
4.2 Permissible internal data acquisition system (DAS) 7
4.2.1 General 7
4.2.2 DAS characteristics 7
4.2.3 DAS mass and mass distribution 8

5 Methods 8
5.1 Calculation of IR-TRACC distances from the IR-TRACC voltage outputs 8

Annex A (normative) Load cell characteristics 10

A.1 Load cell capacities 10
A.2 Load cell sign conventions 10

Annex B (informative) Conventions for examplar permissible load cells and angular displacement sensors 15

B.1 Overview 15
B.2 Repeatability and reproducibility 15
B.3 Durability 15
B.4 Sensitivity 15
B.5 Handling 15
B.6 Calibration 17
B.7 Load cell connector pin codes 17
B.8 Universal neck load cell (W50-71000) 19
B.9 Sacro-iliac load cell (W50-71130) 19
B.10 Lumbar load cell (W50-71120) 20
B.11 Pubic symphysis load cell (W50-71051) 20
B.12 Femoral neck load cell (W50-71080) 20
B.13 Universal leg load cell (W50-71010) 20
B.14 Shoulder load cell (W50-71090) 20
B.15 Universal arm load cell (W50-71070) 20
B.16 Elbow load cell (W50-71060) 20
B.17 Knee contact load cell (W50-71020) 21

Annex C (informative) Conventions for examplar permissible accelerometers 22

C.1 Overview 22
C.2 Linear accelerometer connector pin codes 22
C.3 Rotational accelerometer connector pin codes 22

Annex D (informative) Information regarding sensor output polarities 24

D.1 Overview 24
D.2 Sensor output polarity diagrams 24
