## Ships and marine technology - Risk assessment on anti-fouling systems on ships - Part 2: Marine environmental risk assessment method for anti-fouling systems on ships using biocidally active substances

---

<b>Contents</b>		<b>Page</b>
Foreword .....		iv
Introduction .....		v
1	Scope .....	1
2	Normative references .....	1
3	Terms and definitions .....	1
4	Application .....	2
4.1	General .....	2
4.2	Application considerations .....	2
4.3	Structure and procedure of environmental risk assessment .....	3
5	Review of the risk of a biocidally active substance when used in the anti-fouling system ...	3
5.1	General .....	3
5.2	Assessment when a biocidally active substance is tentatively deemed to have "relatively low risk" .....	4
5.3	Assessment when a certain type of marine environment is considered to be a recipient of biocidally active substances .....	4
6	Exposure assessment .....	4
6.1	Preparing the emission scenario .....	4
6.2	Determination of the PEC .....	6
7	Selection of the appropriate PNEC .....	7
8	Risk characterization .....	7
9	Risk assessment of similar anti-fouling systems .....	7
10	Substances of concern .....	7
11	Risk assessment report .....	7
Annex A (normative) Minimum information required for a risk assessment report .....		8
Bibliography .....		10
