|-----------------------|---|-------------|
| Foreword .....        |   | iv          |
| Introduction .....    |   | v           |
| 1                     | Scope .....   | 1           |
| 2                     | Normative references .....                              | 1           |
| 3                     | Terms and definitions .....                             | 1           |
| 4                     | Preconditions for the execution of the paint work ..... | 2           |
| 4.1                   | Qualification .....                                     | 2           |
| 4.2                   | Condition of the substrate .....                        | 2           |
| 4.3                   | Health and safety and environmental protection .....    | 2           |
| 5                     | Coating materials .....                                 | 3           |
| 5.1                   | Supply .....  | 3           |
| 5.2                   | Storage .....   | 3           |
| 6                     | Execution of paint work .....                           | 3           |
| 6.1                   | General .....   | 3           |
| 6.2                   | Application conditions .....                            | 4           |
| 6.3                   | Application methods .....                               | 5           |
| 6.3.1                 | Brush application .....                                 | 5           |
| 6.3.2                 | Roller application .....                                | 5           |
| 6.3.3                 | Spray application .....                                 | 5           |
| 6.3.4                 | Other application methods .....                         | 5           |
| 6.4                   | Evaluation before work commences .....                  | 5           |
| 7                     | Supervision of the paint work .....                     | 5           |
| 7.1                   | General .....   | 5           |
| 7.2                   | Measurement and test instruments .....                  | 6           |
| 7.3                   | Assessments of the coating .....                        | 6           |
| 8                     | Reference areas and reference specimens .....           | 7           |
| 8.1                   | General .....   | 7           |
| 8.2                   | Previously coated surfaces .....                        | 7           |
| 8.2.1                 | General .....   | 7           |
| 8.2.2                 | Type A reference area .....                             | 7           |
| 8.2.3                 | Type B reference area .....                             | 7           |
| 8.3                   | Reference area records .....                            | 7           |
| 8.4                   | Assessment of coating .....                             | 7           |
| Annex A (informative) | Number of reference areas .....                         | 9           |
| Bibliography .....    |   | 10          |
