Paints and varnishes - Corrosion protection of steel structures by protective paint systems - Part 7: Execution and supervision of paint work

| Contents | Page |
|---|-------------|
| Foreword | iv |
| Introduction | v |
| 1 Scope | 1 |
| 2 Normative references | 1 |
| 3 Terms and definitions | 1 |
| 4 Preconditions for the execution of the paint work | 2 |
| 4.1 Qualification | 2 |
| 4.2 Condition of the substrate | 2 |
| 4.3 Health and safety and environmental protection | 2 |
| 5 Coating materials | 3 |
| 5.1 Supply | 3 |
| 5.2 Storage | 3 |
| 6 Execution of paint work | 3 |
| 6.1 General | 3 |
| 6.2 Application conditions | 4 |
| 6.3 Application methods | 5 |
| 6.3.1 Brush application | 5 |
| 6.3.2 Roller application | 5 |
| 6.3.3 Spray application | 5 |
| 6.3.4 Other application methods | 5 |
| 6.4 Evaluation before work commences | 5 |
| 7 Supervision of the paint work | 5 |
| 7.1 General | 5 |
| 7.2 Measurement and test instruments | 6 |
| 7.3 Assessments of the coating | 6 |
| 8 Reference areas and reference specimens | 7 |
| 8.1 General | 7 |
| 8.2 Previously coated surfaces | 7 |
| 8.2.1 General | 7 |
| 8.2.2 Type A reference area | 7 |
| 8.2.3 Type B reference area | 7 |
| 8.3 Reference area records | 7 |
| 8.4 Assessment of coating | 7 |
| Annex A (informative) Number of reference areas | 9 |
| Bibliography | 10 |
