Paints and varnishes - Corrosion protection of steel structures by protective paint systems - Part 7: Execution and supervision of paint work

Contents		Page
Foreword		iv
Introduction		v
1	Scope	1
2	Normative references	1
3	Terms and definitions	1
4	Preconditions for the execution of the paint work	2
4.1	Qualification	2
4.2	Condition of the substrate	2
4.3	Health and safety and environmental protection	2
5	Coating materials	3
5.1	Supply	3
5.2	Storage	3
6	Execution of paint work	3
6.1	General	3
6.2	Application conditions	4
6.3	Application methods	5
6.3.1	Brush application	5
6.3.2	Roller application	5
6.3.3	Spray application	5
6.3.4	Other application methods	5
6.4	Evaluation before work commences	5
7	Supervision of the paint work	5
7.1	General	5
7.2	Measurement and test instruments	6
7.3	Assessments of the coating	6
8	Reference areas and reference specimens	7
8.1	General	7
8.2	Previously coated surfaces	7
8.2.1	General	7
8.2.2	Type A reference area	7
8.2.3	Type B reference area	7
8.3	Reference area records	7
8.4	Assessment of coating	7
Annex A (informative)	Number of reference areas	9
