ISO 6504-1:2019 (E)

Paints and varnishes — Determination of hiding power — Part 1: Kubelka-Munk method for white and light-coloured paints

Contents

Foreword

Introduction

1 Scope

2 Normative references

3 Terms and definitions

4 Principle

5 Kubelka-Munk equations

6 Apparatus and materials

6.1 Substrates
6.1.1 Determination of RB
6.1.2 Determination of R∞
6.2 Film applicators
6.3 Reflectometer
6.4 Template

7 Limitations

8 Sampling

9 Procedure

9.1 Determination of R∞
9.2 Determination of RB
9.2.1 Preparation of test films
9.2.1.1 General
9.2.1.2 Method using polyester film
9.2.1.3 Method using black glass plates
9.2.1.4 Drying and conditioning
9.2.2 Measurement of reflectance RB
9.2.2.1 General
9.2.2.2 Method using polyester film
9.2.2.3 Method using black glass plates
9.3 Determination of film thickness
9.3.1 General
9.3.2 Method using polyester film
9.3.3 Method using black glass plates

10 Expression of results

10.1 Calculation of wet film thickness
10.2 Calculation of hiding power

11 Precision

11.1 Repeatability (r)
11.2 Reproducibility (R)

12 Test report

Annex A (informative) Graphs for determination of St from RB and R∞ for Rg = 0,80

Annex B (informative) Table of values of reflectivity R∞ and factor α for Rg = 0,80

Annex C (informative) Examples of the calculation of hiding power from measurements of RB and R∞

C.1 Determination of the scattering coefficient, S
C.2 Determination of hiding power, V
