

ISO/TR 22770:2019-07 (E)

Preparation of steel substrates before application of paints and related products - Analytical colorimetry method to support visual assessment of surface preparation grades

Contents		Page
Foreword		iv
Introduction		v
1	Scope	1
2	Normative references	1
3	Terms and definitions	1
4	Symbols	2
5	Principle	2
6	Recommendations for instruments	3
6.1	Instrument handling	3
6.2	Instrument specifications	3
6.2.1	Illuminant and observer	3
6.2.2	Illuminating and viewing conditions	3
6.2.3	Tolerance of the instrument	4
7	Supporting data	4
7.1	General	4
7.2	Sample preparation	4
7.3	Results	4
8	Examples of application	5
8.1	General	5
8.2	Steel pipes producer for oil and gas industry	5
8.2.1	Application: control quality of blasting operation prior to anticorrosion coating. 5 8.2.2 Reference substrate	6
8.2.3	Quality control	6
8.3	Cast iron foundry	6
8.3.1	Application: control quality of desanding operation of cast iron automotive parts	6
8.3.2	Reference substrate	6
8.3.3	Quality control	6
8.4	Trailers manufacturer	6
8.4.1	Application: control quality of blasting operation prior to painting	6
8.4.2	Reference substrate	6
8.4.3	Quality control	7
8.5	Production of freight wagons	7
8.5.1	Application: control quality of blasting operation prior to anticorrosion coating. 7 8.5.2 Reference substrate	7
8.5.3	Quality control	7
8.6	Cold drawn bars producer	7
8.6.1	Application: optimisation of descaling operation	7
8.6.2	Reference substrate	7
8.6.3	Quality control	7

Annex A (informative) Methodology	8
