Foreword	iv
Introduction	vi
1 Scope	1
2 Normative references	1
3 Terms and definitions	1
4 Abbreviated terms, and changes from the previous edition	4
4.1 Abbreviated terms	4
4.2 Character code notations	5
4.3 Changes from the previous edition and backwards compatibility	5
4.4 Cultural and language adaptability	5
5 Conformance	6
6 Geographic point location representation	6
6.1 Overview	6
6.2 Component representation	7
6.3 Coordinate tuple	7
6.4 Character string delimiters and terminator notation	7
6.5 CRS identifier structure	8
6.6 Text string representation	10
6.6.1 Background	10
6.6.2 Formatting rules for angular measures	10
6.6.3 Component structure	12
7 Human-readable GPL representation	16
Annex A (normative) Conformance and abstract test suite	20
Annex B (normative) Backwards compatible representation of geographic point location	23
Annex C (informative) Latitude and longitude coordinates are not unique	29
Annex D (informative) Latitude and longitude resolution	30
Annex E (informative) Changes from ISO 6709:2008	31
Bibliography	33
