DIN EN ISO 13786:2008-04 (E)

Thermal performance of building components - Dynamic thermal characteristics - Calculation methods (ISO 13786:2007)

Contents

Page

Foreword 3

Introduction 4

1 Scope 5

2 Normative references 5

3 Terms, definitions, symbols and units 6
3.1 Terms and definitions 6
3.2 Symbols and units 9
3.3 Subscripts 10
3.4 Other symbols 10

4 Period of the thermal variations 10

5 Data required 10

6 Heat transfer matrix of a multi-layer component 11
6.1 General 11
6.2 Procedure 11
6.3 Heat transfer matrix of a homogeneous layer 11
6.4 Heat transfer matrix of plane air cavities 12
6.5 Heat transfer matrix of a building component 12

7 Dynamic thermal characteristics 12
7.1 Characteristics for any component 12
7.2 Characteristics for components consisting of plane and homogeneous layers 12

8 Report 14
8.1 Calculation report 14
8.2 Summary of results 14

Annex A (normative) Simplified calculation of the heat capacity 15

Annex B (informative) Principle of the method and examples of applications 17

Annex C (informative) Further information for Computer programming 21

Annex D (informative) Examples 23

Bibliography 26
