

ISO 22111:2007-11 (E)

Bases for design of structures - General requirements

Contents		Page
Foreword		iv
Introduction		v
1	Scope	1
2	Normative references	1
3	Terms and definitions	1
4	Symbols	5
5	Application	7
6	Basic requirements for structural performance	7
7	Classification of structures and elements of structures	7
8	Actions	8
8.1	General	8
8.2	Evaluation of values of actions	8
8.3	Permanent actions	8
8.4	Variable actions	8
8.5	Accidental actions	9
9	Combinations of actions	9
9.1	General	9
9.2	Ultimate limit states	9
9.2.1	Strength	9
9.2.2	Static equilibrium	10
9.3	Serviceability limit states	10
9.4	Formats for presentation of design values for leading and accompanying actions	10
10	Analysis and testing	11
10.1	Analysis	11
10.2	Testing	11
11	Demonstrating compliance with requirements	11
11.1	General	11
11.2	Ultimate limit state	12
11.2.1	Strength	12
11.2.2	Static equilibrium	12
11.3	Robustness	12
11.4	Serviceability	13
11.5	Durability	13
Annex A (informative)	Guidance for adopting groups	14
Annex B (informative)	Formats for presentation of design values for use in combinations of actions	17
Annex C (informative)	Calibration of design values	21
Annex D (informative)	Design procedure	22
