Foreword 5

1 Scope 8

2 Normative references 8

3 Definitions, symbols and abbreviations 11
3.1 Terms and definitions 11
3.2 Symbols and abbreviations 13

4 Classification 13
4.1 Exposure classes related to environmental actions 13
4.2 Fresh concrete 17
4.2.1 Consistence classes 17
4.2.2 Classes related to maximum particle size 18

5 Requirements for concrete and methods of verification 18
5.1 Basic requirements for constituent materials 18
5.1.1 General 18
5.1.2 Cement 18
5.1.3 Aggregates 18
5.1.4 Mixing water 18
5.1.5 Admixtures 18
5.1.6 Additions (including mineral fillers and pigments) 19
5.1.7 Fibres 19
5.2 Basic requirements for composition of concrete 19
5.2.1 General 19
5.2.3 Use of aggregates 20
5.2.4 Use of recycled water 23
5.2.5 Use of additions 23
5.2.6 Use of admixtures 27
5.2.7 Chloride content 28
5.2.8 Concrete temperature 29
5.2.9 Use of fibres 29
5.3 Requirements related to exposure classes 30
5.3.2 Limiting values for concrete composition 30
5.3.3 Performance-related design methods 31
5.3.4 Requirements for underwater concrete 31
5.3.5 Concrete exposed to water-contaminating substances 31
5.3.6 Concrete exposed to high service temperatures 32
5.3.7 High-strength concrete 32
5.3.8 Cement mortar for jointing and pointing 32
5.4 Requirements for fresh concrete 32
5.4.1 Consistence 32
5.4.2 Cement content and water/cement ratio 33
5.4.3 Air content 33
5.5 Requirements for hardened concrete 33
5.5.1 Strength 33
5.5.3 Resistance to water penetration 34

5.5.5 Wear resistance ... 34

6 Specification of concrete ... 34
6.1 General ... 34
6.2 Specification for designed concrete ... 35
6.2.2 Basic requirements ... 35
6.2.3 Additional requirements ... 35
6.3 Specification for prescribed concrete ... 35
6.3.2 Basic requirements ... 35
6.4 Specification of standardized prescribed concrete ... 35

7 Delivery of fresh concrete ... 35
7.1 Information from the user of the concrete to the producer ... 35
7.2 Information from the producer of the concrete to the user ... 36
7.3 Delivery ticket for ready-mixed concrete ... 36
7.5 Consistence at delivery ... 37
7.6 Transport of concrete to the site ... 37

8 Conformity control and conformity criteria ... 38
8.2 Conformity control for designed concrete ... 38
8.2.1 Conformity control for compressive strength ... 38
8.2.2 Conformity control for tensile splitting strength ... 39
8.3 Conformity control of prescribed concrete including standardized prescribed concrete ... 39
8.4 Actions in the case of non-conformity of the product ... 39

9 Production control ... 40
9.1 General ... 40
9.3 Recorded data and other documents ... 40
9.5 Concrete composition and initial testing ... 40
9.6 Personnel, equipment and installation ... 41
9.6.1 Personnel ... 41
9.6.2 Equipment and installation ... 41
9.7 Batching of constituent materials ... 41
9.8 Mixing of concrete ... 41
9.9 Production control procedures ... 42

10 Evaluation of conformity ... 42
10.1 General ... 42
10.2 Assessment, surveillance and certification of production control ... 43

11 Designation for designed concrete ... 43

Annex B (normative) Identity testing for compressive strength ... 44

Annex C (normative) Provisions for assessment, surveillance and certification of production control ... 44

C.2 Tasks for the inspection body ... 44
C.2.1 Initial assessment of production control ... 44
C.3 Tasks for certification body ... 45
C.3.1 Certification of concrete ... 45
C.3.2 Measures in case of non-conformity ... 46

Annex D (informative) Bibliography ... 46

Annex E (informative) Guidance on the application of the equivalent performance concept of concrete properties ... 46

Annex F (normative) Recommendations for limiting values of concrete composition ... 47

Annex H (normative) Additional provisions for high-strength concrete ... 55

Annex K (normative) Concrete families 57

Annex L (informative) Particle size analysis 57

Annex U (normative) Requirements for aggregates 60

Figures concrete construction, standards for design and workmanship, standards for constituent materials, and test standards 7

Figure L.1 -- Grading curves for 8 mm maximum particle size 58

Figure L.2 -- Grading curves for 16 mm maximum particle size 58

Figure L.3 -- Grading curves for 32 mm maximum particle size 59

Figure L.4 -- Grading curves for 63 mm maximum particle size 59

Tables Table 1 -- Exposure classes and moisture classes 14

Table 5 -- Compaction classes 17

Table 6 -- Flow classes 17

Table 10 -- Maximum chloride content of concrete 28

Table 22 -- Control of constituent materials (continued) 42

Table F.2.1 -- Limiting values for composition and properties of concrete (1) 48

Table F.2.2 -- Limiting values for composition and properties of concrete (2) 49

Table F.3.1 -- Ranges of application for cement as in DIN 1164-10, DIN 1164-12, DIN EN 197-1, and DIN EN 197-4, and FE type, CEM-I-SE type and CEM-II-SE type cements as in Table F.3.2 -- Ranges of application for CEM-II-M type cement as in DIN 1164-10, DIN 1164-12 and DIN EN 197-1, with three main constituents, and FE type and CEM-II SE type Table F.3.3 -- Ranges of application for CEM IV and CEM V type cements with two or three main constituents as in DIN 1164-10, DIN 1164-12 and DIN EN 197-1, and FE type Table F.3.4 -- Ranges of application for cement as in DIN EN 14216, used for preparation of Table F.4.1 -- Maximum permitted ultrafines content for concrete up to concrete strength classes C50/60 and LC50/55 and of exposure classes XF and XM, with a maximum particle size between 16 mm and 63 mm 54

Table F.4.2 -- Maximum permitted ultrafines content for concrete of concrete strength classes C55/67 and LC55/60 and of all exposure classes, with a maximum particle size between 16 mm and 63 mm 54

Table F.5 -- Minimum cement content for standardized prescribed concrete with cement of strength class 32,5 as specified in DIN EN 197-1 and with a maximum particle size of 32 mm 54

Table H.1 -- Additional control of constituent materials of high-strength concrete 55

Table H.2 -- Additional control of equipment for production of high-strength concrete 56

Table H.3 -- Additional control of production procedures and of properties of high-strength concrete 56

Table U.1 -- Standard requirements for aggregates as in DIN EN 12620 60

Table U.2 -- Other requirements for aggregates as in DIN EN 12620 61

Table U.3 -- Standard requirements for aggregates as in DIN EN 13055-1 62

Table U.4 -- Other requirements for aggregates as in DIN EN 13055-1 63
