## General principles on the design of structures for durability

---

Contents	Page
Foreword .....	iv
Introduction .....	v
1 Scope .....	1
2 Normative references .....	1
3 Terms and definitions .....	1
4 Symbols .....	4
5 Application .....	4
6 Basic concepts for verifying durability .....	5
6.1 General .....	5
6.2 Structure environment .....	5
6.3 Transfer mechanisms .....	5
6.4 Environmental action .....	5
6.5 Action effects .....	6
6.6 Limit states .....	6
7 Durability requirements .....	7
7.1 Basic durability requirement .....	7
7.2 Formats for checking durability .....	8
8 Design life of a structure and its components, tD .....	11
8.1 Structure .....	11
8.2 Components .....	11
8.3 Component service life related to the design life of the structure .....	11
8.4 Difficulty and cost of maintenance or replacement .....	11
8.5 Consequences of failure .....	11
8.6 Selection of target reliability .....	11
9 Predicted service life, tSP .....	12
9.1 General .....	12
9.2 Prediction based on experience .....	13
9.3 Prediction based on modelling .....	13
9.4 Prediction based on testing .....	14
10 Strategies for durability design .....	14
Annex A (informative) Examples of the application of the limit-states method .....	15
Annex B (informative) Examples of influences (structure environment) and agents (environmental action) .....	26
Annex C (informative) Examples of transfer mechanisms .....	32
Annex D (informative) Environmental actions for structural materials and their control .....	34
Annex E (informative) Procedures for ensuring durability .....	37
Bibliography .....	39
