# DIN 18800-1:2008-11 (E)

## Steel structures - Part 1: Design and construction

## Contents

Page

Foreword ..... 4

1 General ..... 5
1.1 Scope ..... 5
1.2 Normative references ..... 5

2 Documentation ..... 8

3 Terms, definitions and symbols ..... 9
3.1 Basic terms and definitions ..... 9
3.2 Other terms and definitions ..... 11
3.3 Common notation ..... 11

4 Materials ..... 14
4.1 Components ..... 14
4.2 Fasteners ..... 19
4.2.1 Bolts, rivets, shear connectors and stud bolts ..... 19
4.2.2 Welding consumables ..... 21
4.3 High-strength tension members ..... 21
4.3.1 Wires used for ropes ..... 21
4.3.2 Anchorages ..... 21
4.3.3 Cables ..... 22
4.3.4 Inspection (quality control) ..... 22
4.3.5 Characteristic values of mechanical properties of high-strength tension members ..... 22

5 Structural detailing ..... 25
5.1 General ..... 25
5.2 Connections ..... 25
5.2.1 General ..... 25
5.2.2 Bolted and riveted connections ..... 26
5.2.3 Welded joints ..... 30
5.3 High-strength tension members ..... 32
5.3.1 Types ..... 32
5.3.2 Anchorages ..... 33
5.3.3 Guides and grips for spiral ropes ..... 34
5.3.4 Guides and clamps for use with cables ..... 36

6 Load assumptions ..... 36

7 Design analyses ..... 37
7.1 Mandatory analyses ..... 37
7.2 Calculation of stresses resulting from actions ..... 38
7.2.1 Actions ..... 38
7.2.2 Assumptions for ultimate limit state analysis ..... 39
7.2.3 Assumptions for serviceability limit state analysis ..... 41
7.3 Calculation of resistances on the basis of resistance parameters ..... 42
7.3.1 Resistance parameters ..... 42
7.3.2 Resistances ..... 43
7.4 Methods of analysis ..... 43
7.5 Ultimate limit state analysis ..... 48
7.5.1 Criteria and detailing ..... 48
7.5.2 Elastic-elastic method ..... 52

7.5.3 Elastic-plastic method ... 59
7.5.4 Plastic-plastic method ... 63
7.6 Verification of static equilibrium ... 66
7.7 Verification of durability ... 68

8 Stresses and resistances in connections ... 69
8.1 General ... 69
8.2 Bolted and riveted connections ... 70
8.2.1 Ultimate limit state analysis ... 70
8.2.2 Serviceability limit state ... 75
8.2.3 Deformations ... 76
8.3 Pin connections ... 76
8.4 Welded connections ... 79
8.4.1 Arc welding ... 79
8.4.2 Other welding processes ... 88
8.5 Combinations of fasteners ... 88
8.6 Transfer of compression by contact ... 89

9 Resistance of high-strength tension members in ultimate limit state analysis ... 89
9.1 General ... 89
9.2 High-strength tension members and their anchorages ... 90
9.2.1 Ultimate limit state analysis ... 90
9.2.2 Resistance of high-strength tension members ... 90
9.2.3 Resistance of sockets ... 92
9.3 Guides, grips and clamps ... 94
9.3.1 Limit lateral pressure and partial safety factor ... 94
9.3.2 Slip ... 95

Anhang A (normative) Further provisions ... 96

A.1 Special provision for steel grade St 52-3 ... 96
A.2 Certificates ... 96
A.3 Marking of products ... 96
A.4 has been deleted ... 96
A.5 has been deleted ... 96
A.6 Workmanship ... 96
A.7 Proof of weld quality ... 96
A.8 Shop primers ... 96

Annex B (informative) List of withdrawn or replaced standards and technical rules to which reference is made ... 97

Bibliography ... 102
