DIN 18800-7:2008-11 (E)

Steel structures - Part 7: Execution and constructor's qualification

Contents

Page

Foreword 5

1 Scope 6

2 Normative references 6

3 Terms and definitions 11

4 Documentation 12
4.1 Execution specification documents 12
4.2 Verification documents 13

5 Materials 13
5.1 Rolled steels, forged steels and cast materials 13
5.1.1 Types 13
5.1.2 Dimensions 13
5.1.3 Quality classes 14
5.1.4 Additional requirements 14
5.1.5 Certificates 15
5.2 Welding consumables 15
5.3 Fasteners 16
5.3.1 Bolts, nuts and washers 16
5.3.2 Other mechanical connections 17
5.3.3 Marking and certificates 18

6 Fabrication 19
6.1 Identification of materials and components 19
6.2 Cutting 19
6.3 Forming, heat treatment and flame straightening 19
6.4 Making of perforations 20
6.5 Cut-outs 20

7 Welding 20
7.1 Welding requirements 20
7.1.1 Welding procedure specifications (WPS) 20
7.1.2 Welding procedure tests or advance production tests 22
7.2 Welding plan 23
7.3 Preparation for welding 23
7.3.1 General 23
7.3.2 Storage and handling of welding consumables 23
7.3.3 Weather protection 23
7.4 Execution of welding work 23
7.4.1 General 23
7.4.2 Preheating 23
7.4.3 Temporary attachments for assembly work 24
7.4.4 Stud welding 24
7.4.5 Welding of concrete-reinforcing steel 24
7.4.6 Additional requirements 24

8 Bolted and riveted joints 24
8.1 General 24
8.2 Hole dimensions 25

8.3 Use of bolted joints 25
8.4 Preparing contact surfaces for bolted joints 26
8.5 Tightening of bolted joints that are not preloaded 28
8.6 Tightening of preloaded bolted joints 28
8.6.1 General 28
8.6.2 Torque control method 30
8.6.3 Impact turn method 31
8.6.4 Angle torquing (turn of nut) method 31
8.6.5 Combined preloading method 31
8.7 Riveting 32

9 Erection 32
9.1 Erection method statement 32
9.2 Structural bearings 32
9.3 Erection work 33
9.3.1 General 33
9.3.2 Marking 33
9.3.3 Handling and storage on site 33
9.3.4 Alignment 33

10 Corrosion protection treatment 33
10.1 General 33
10.2 Surface preparation 34
10.3 Shop primers 34
10.4 Coatings 34
10.5 Protective treatment of fasteners 35

11 Geometric tolerances 35
11.1 General 35
11.2 Fabrication tolerances 35
11.3 Erection tolerances 36

12 Inspection and testing 36
12.1 General 36
12.2 Fabrication, assembly and erection 37
12.2.1 Welding 37
12.2.2 Preloaded bolted joints 39
12.2.3 Riveted connections 40
12.2.4 Corrosion protection treatment 40

13 Constructor's qualification 40
13.1 General 40
13.2 Internal (factory) production control 40
13.3 Internal (factory) production control measures 41
13.4 Requirements on welding contractors and subcontractors (welding businesses) 41
13.4.1 General 41
13.4.2 Welders and operators 41
13.4.3 Welding coordinators 42
13.4.4 Production facilities 42
13.4.5 Certification 42
13.5 Classification of welded components 43

Annex A (informative) Information relating to the standards referred to in clause 2 49

Bibliography 58

Figures Figure 1 -- Permissible deviations for anchor bolts with position adjustment options 36

Tables Table 100 -- Equivalence criteria for the bend test on welded joints 14

Table 2 -- Methods of making holes 20

Table 3A -- Standards applicable when drafting welding procedure specifications 21

Table 3B -- Methods of qualifying welding procedures 22

Table 4 -- Information on the suitability of coatings/coating systems in combination with preloaded shear bolted joints and fitted shear bolted joints (SLV/SLVP) 27

Table 5 -- Preload forces and tightening torques to be applied using the torque control method and the impact turn method for bolt assemblies of property class 8.8 as in line 5 of Table 1 29

Table 6 -- Preload forces and tightening torques to be applied using the torque control method, the impact turn method, angle torquing (turn of nut) method and combined preloading methods for bolt assemblies of property class 10.9 as in lines 6 and 7 of Table 1 30

Table 7 -- Further rotation angle or rotation factor V for the combined preloading method for bolt and nut assemblies of property class 10.9 as in lines 6 and 7 of Table 1 32

Table 8 -- Preload testing for nominal preload forces 39

Table 9 -- Class A 43

Table 10 -- Class B 44

Table 11 -- Class C 45

Table 12 -- Class D 46

Table 13 -- Class E 47
