

DIN EN ISO 19136:2009-09 (E)

Geoinformation – Geography Markup Language (GML) (ISO 19136:2007);
Englische Fassung EN ISO 19136:2009

Contents

	Page
Foreword.....	5
Introduction	6
1 Scope	8
2 Conformance	8
2.1 Conformance requirements	8
2.2 Conformance classes related to GML application schemas	9
2.3 Conformance classes related to GML profiles	9
2.4 Conformance classes related to GML documents	11
2.5 Conformance classes related to software implementations	11
3 Normative references	11
4 Terms and symbols	12
4.1 Terms and definitions	12
4.2 Symbols and abbreviated terms	19
5 Conventions	20
5.1 XML namespaces	20
5.2 Versioning	21
5.3 Deprecated parts of previous versions of GML	21
5.4 UML notation	21
5.5 XML Schema	23
6 Overview of the GML schema	23
6.1 GML schema	23
6.2 GML application schemas	23
6.3 Relationship between the ISO 19100 series of International Standards, the GML schema and GML application schemas	24
6.4 Organization of this International Standard	25
6.5 Deprecated and experimental schema components	27
7 GML schema — General rules and base schema components	27
7.1 GML model and syntax	27
7.2 gmlBase schema components	29
8 GML schema — Xlinks and basic types	40
8.1 Xlinks — Object associations and remote properties	40
8.2 Basic types	41
9 GML schema — Features	50
9.1 General concepts	50
9.2 Relationship with ISO 19109	50
9.3 Features	50
9.4 Standard feature properties	51
9.5 Geometry properties	53
9.6 Topology properties	55
9.7 Temporal properties	55
9.8 Defining application-specific feature types	56
9.9 Feature collections	57
9.10 Spatial reference system used in a feature or feature collection	59
10 GML schema — Geometric primitives	59
10.1 General concepts	59
10.2 Abstract geometric primitives	65
10.3 Geometric primitives (0-dimensional)	66
10.4 Geometric primitives (1-dimensional)	67
10.5 Geometric primitives (2-dimensional)	79
10.6 Geometric primitives (3-dimensional)	89

11	GML schema — Geometric complex, geometric composites and geometric aggregates	91
11.1	Overview.....	91
11.2	Geometric complex and geometric composites	91
11.3	Geometric aggregates.....	94
12	GML schema — Coordinate reference systems schemas	99
12.1	Overview.....	99
12.2	Reference systems.....	101
12.3	Coordinate reference systems	102
12.4	Coordinate systems	110
12.5	Datums	118
12.6	Coordinate operations	124
13	GML schema — Topology	137
13.1	General concepts	137
13.2	Abstract topology.....	137
13.3	Topological primitives	138
13.4	Topological collections.....	142
13.5	Topology complex.....	145
14	GML schema — Temporal information and dynamic features	146
14.1	General concepts	146
14.2	Temporal schema.....	147
14.3	Temporal topology schema.....	156
14.4	Temporal reference systems.....	159
14.5	Representing dynamic features	166
15	GML schema — Definitions and dictionaries	170
15.1	Overview.....	170
15.2	Dictionary schema.....	171
16	GML schema — Units, measures and values	173
16.1	Introduction.....	173
16.2	Units schema	174
16.3	Measures schema.....	179
16.4	Value objects schema	180
17	GML schema — Directions	188
17.1	Direction schema.....	188
17.2	direction, DirectionPropertyType	188
17.3	DirectionVectorType	188
17.4	DirectionDescriptionType.....	189
18	GML schema — Observations	190
18.1	Observations.....	190
18.2	Observation schema	190
19	GML schema — Coverages	194
19.1	The coverage model and representations	194
19.2	Grids schema.....	197
19.3	Coverage schema.....	200
20	Profiles	214
20.1	Profiles of GML and application schemas	214
20.2	Definition of profile.....	214
20.3	Relation to application schema	215
20.4	Rules for elements and types in a profile	215
20.5	Rules for referencing GML profiles from application schemas	216
20.6	Recommendations for application schemas using GML profiles	216
20.7	Summary of rules for GML profiles	217

21	Rules for GML application schemas	217
21.1	Instances of GML objects	217
21.2	GML application schemas	218
21.3	Schemas defining Features and Feature Collections	221
21.4	Schemas defining spatial geometries	222
21.5	Schemas defining spatial topologies	223
21.6	Schemas defining time	224
21.7	Schemas defining coordinate reference systems	224
21.8	Schemas defining coverages	226
21.9	Schemas defining observations	227
21.10	Schemas defining dictionaries and definitions	228
21.11	Schemas defining values	229
21.12	GML profiles of the GML schema	229
Annex A	(normative) Abstract test suites for GML application schemas, GML profiles and GML documents	232
Annex B	(normative) Abstract test suite for software implementations	247
Annex C	(informative) GML schema	251
Annex D	(normative) Implemented Profile of the ISO 19100 series of International Standards and Extensions	253
Annex E	(normative) UML-to-GML application schema encoding rules	318
Annex F	(normative) GML-to-UML application schema encoding rules	338
Annex G	(informative) Guidelines for subsetting the GML schema	348
Annex H	(informative) Default styling	361
Annex I	(informative) Backwards compatibility with earlier versions of GML	372
Annex J	(informative) Modularization and dependencies	389
Bibliography	391
Index	393
