## Hygrothermal performance of buildings - Calculation and pre sentation of climatic data - Part 3: Calculation of a driving rain index for vertical surfaces from hourly wind and rain data

---

| <b>Contents</b>   | <b>Page</b> |
|---|-------------|
| Foreword .....  | iv          |
| Introduction .....  | v           |
| 1 <b>Scope</b> .....  | 1           |
| 2 <b>Terms, definitions, symbols and units</b> .....  | 2           |
| 3 <b>Calculation of airfield indices from hourly wind and rain data</b> .....                               | 4           |
| 4 <b>Estimation of the effect of driving rain from average wind and present weather code for rain</b> ..... | 4           |
| 5 <b>Calculation of wall indices</b> .....  | 5           |
| <b>Annex A (informative) Limits to the validity of the calculated indices</b> .....                         | 11          |
| <b>Annex B (informative) The nature of a "spell" of driving rain</b> .....                                  | 12          |
| <b>Annex C (informative) The procedure for generating the driving-rain maps</b> .....                       | 13          |
| <b>Annex D (informative) Comparison of methods specified in Clauses 3 and 4</b> .....                       | 15          |
| <b>Bibliography</b> .....   | 17          |
