ISO/TS 19129:2009-04 (E)

Geographic information - Imagery, gridded and coverage data framework

Contents

Page

Foreword iv

Introduction v

1 Scope 1

2 Conformance 1

3 Normative references 1

4 Terms and definitions 1
4.1 Terms 1
4.2 Abbreviated terms 7
4.3 Notation 7

5 Background for the framework 8
5.1 Legacy concepts and terminology 8
5.2 Separation of carrier and content 8
5.3 Content model 9

6 General feature model as applied to imagery and gridded data 10
6.1 Coverages as features 10
6.2 Additional feature relationships 10

7 Framework 10
7.1 Framework structure 10
7.2 Elements of the framework structure 12
7.3 Encoding level 15
7.4 Imagery and gridded data portrayal 16
7.5 Feature relationship for LUTs 16

8 Spatial referencing of imagery, gridded and coverage data 17

9 Imagery, gridded and coverage data structure 17
9.1 IGCD structure and metadata 17
9.2 Framework structure classes 19

10 Templates 20
10.1 Application schema for imagery and gridded data 20
10.2 Grid coverages 21
10.3 Continuous quadrilateral grid coverage 23
10.4 Riemann hyperspatial multidimensional grid coverage 24
10.5 TIN coverage 27
10.6 Discrete point coverage 28
10.7 Discrete surface grid coverage 29
11 Tiling 31
11.1 Tiled grids 31
11.2 Tile densities 31
11.3 Tiling scheme 32

Annex A (normative) Abstract test suite 33

Annex B (informative) Use cases 35

Annex C (informative) Portrayal of imagery and gridded data 36

Bibliography 37
