

# DIN EN 13670:2011-03 (E)

## Execution of concrete structures

---

| <b>Contents</b>    |                                                                    | <b>Page</b> |
|--------------------|--------------------------------------------------------------------|-------------|
| Foreword .....     |                                                                    | 5           |
| Introduction ..... |                                                                    | 6           |
| <b>1</b>           | <b>Scope .....</b>                                                 | <b>7</b>    |
| <b>2</b>           | <b>Normative references .....</b>                                  | <b>7</b>    |
| <b>3</b>           | <b>Definitions .....</b>                                           | <b>8</b>    |
| <b>4</b>           | <b>Execution management .....</b>                                  | <b>11</b>   |
| 4.1                | Assumptions .....                                                  | 11          |
| 4.2                | Documentation .....                                                | 11          |
| 4.2.1              | Execution specification .....                                      | 11          |
| 4.2.2              | Quality Plan .....                                                 | 12          |
| 4.2.3              | Execution record documentation .....                               | 12          |
| 4.2.4              | Special record documentation .....                                 | 12          |
| 4.3                | Quality Management .....                                           | 12          |
| 4.3.1              | Execution classes .....                                            | 12          |
| 4.3.2              | Inspection of materials and products .....                         | 13          |
| 4.3.3              | Inspection of execution .....                                      | 13          |
| 4.4                | Action in the event of a non-conformity .....                      | 14          |
| <b>5</b>           | <b>Falsework and formwork .....</b>                                | <b>15</b>   |
| 5.1                | Basic requirements .....                                           | 15          |
| 5.2                | Materials .....                                                    | 15          |
| 5.2.1              | General .....                                                      | 15          |
| 5.2.2              | Release agents .....                                               | 15          |
| 5.3                | Design and installation of falsework .....                         | 15          |
| 5.4                | Design and installation of formwork .....                          | 16          |
| 5.5                | Special formwork .....                                             | 16          |
| 5.6                | Inserts in formwork and embedded components .....                  | 16          |
| 5.6.1              | General .....                                                      | 16          |
| 5.6.2              | Making good of temporary recesses and holes .....                  | 17          |
| 5.7                | Removal of formwork and falsework .....                            | 17          |
| <b>6</b>           | <b>Reinforcement .....</b>                                         | <b>17</b>   |
| 6.1                | General .....                                                      | 17          |
| 6.2                | Materials .....                                                    | 17          |
| 6.3                | Bending, cutting, transport and storage of the reinforcement ..... | 18          |
| 6.4                | Welding .....                                                      | 19          |
| 6.5                | Joints .....                                                       | 19          |
| <b>7</b>           | <b>Prestressing .....</b>                                          | <b>20</b>   |
| 7.1                | General .....                                                      | 20          |
| 7.2                | Materials for prestressing .....                                   | 20          |
| 7.2.1              | Post-tensioning systems .....                                      | 20          |
| 7.2.2              | Sheaths .....                                                      | 20          |
| 7.2.3              | Tensile elements .....                                             | 21          |
| 7.2.4              | Anchorage elements and accessories .....                           | 21          |
| 7.2.5              | Tendon supports .....                                              | 21          |
| 7.2.6              | Cement-based grout .....                                           | 21          |

|       |                                                                |    |
|-------|----------------------------------------------------------------|----|
| 7.2.7 | Grease, wax or other products .....                            | 21 |
| 7.3   | Transport and storage .....                                    | 21 |
| 7.4   | Installation of tendons .....                                  | 22 |
| 7.4.1 | General .....                                                  | 22 |
| 7.4.2 | Pre-tensioned tendons .....                                    | 22 |
| 7.4.3 | Post-tensioned bonded tendons .....                            | 22 |
| 7.4.4 | Internal and external unbonded tendons .....                   | 22 |
| 7.5   | Tensioning .....                                               | 23 |
| 7.5.1 | General .....                                                  | 23 |
| 7.5.2 | Pre-tensioned tendons .....                                    | 23 |
| 7.5.3 | Post-tensioned bonded tendons .....                            | 23 |
| 7.5.4 | Internal and external unbonded tendons .....                   | 24 |
| 7.6   | Protective measures (grouting, greasing) .....                 | 24 |
| 7.6.1 | General .....                                                  | 24 |
| 7.6.2 | Pre-tensioned tendons .....                                    | 24 |
| 7.6.3 | Post-tensioned bonded tendons .....                            | 24 |
| 7.6.4 | Internal or external unbonded tendons .....                    | 24 |
| 7.6.5 | Grouting operations .....                                      | 24 |
| 7.6.6 | Greasing operations .....                                      | 25 |
| 7.6.7 | Sealing .....                                                  | 25 |
| 8     | Concreting .....                                               | 25 |
| 8.1   | Specification of concrete .....                                | 25 |
| 8.2   | Pre-concreting operations .....                                | 26 |
| 8.3   | Delivery, reception and site transport of fresh concrete ..... | 26 |
| 8.4   | Placing and compaction .....                                   | 27 |
| 8.4.1 | General .....                                                  | 27 |
| 8.4.2 | Lightweight Aggregate Concrete .....                           | 27 |
| 8.4.3 | Self Compacting Concrete .....                                 | 27 |
| 8.4.4 | Sprayed concrete .....                                         | 27 |
| 8.4.5 | Slipforming .....                                              | 28 |
| 8.4.6 | Underwater concreting .....                                    | 28 |
| 8.5   | Curing and protection .....                                    | 28 |
| 8.6   | Post-concreting operations .....                               | 29 |
| 8.7   | Concreting of composite structures .....                       | 30 |
| 8.8   | Surface Finish .....                                           | 30 |
| 9     | Execution with precast concrete elements .....                 | 30 |
| 9.1   | General .....                                                  | 30 |
| 9.2   | Factory produced precast elements .....                        | 30 |
| 9.3   | Site manufactured precast elements .....                       | 30 |
| 9.4   | Handling and storage .....                                     | 30 |
| 9.4.1 | General .....                                                  | 30 |
| 9.4.2 | Handling .....                                                 | 31 |
| 9.4.3 | Storage .....                                                  | 31 |
| 9.5   | Placing and adjustment .....                                   | 31 |
| 9.5.1 | General .....                                                  | 31 |
| 9.5.2 | Placing .....                                                  | 31 |
| 9.6   | Jointing and completion works .....                            | 32 |
| 9.6.1 | General .....                                                  | 32 |
| 9.6.2 | In-situ works .....                                            | 32 |
| 9.6.3 | Structural connections .....                                   | 32 |
| 10    | Geometrical tolerances .....                                   | 32 |
| 10.1  | General .....                                                  | 32 |
| 10.2  | Reference system .....                                         | 33 |
| 10.3  | Base supports (foundations) .....                              | 34 |
| 10.4  | Columns and walls .....                                        | 34 |
| 10.5  | Beams and slabs .....                                          | 36 |
| 10.6  | Sections .....                                                 | 37 |
| 10.7  | Surfaces and edge straightness .....                           | 39 |
| 10.8  | Tolerances for holes and inserts .....                         | 39 |

|                                                                       |           |
|-----------------------------------------------------------------------|-----------|
