ISO 13824:2009-11 (E)

Bases for design of structures - General principles on risk assessment of systems involving structures

Contents

Page

Foreword v

Introduction vi

1 Scope 1

2 Normative references 1

3 Terms and definitions 2

4 General framework of risk assessment of systems involving structures 4
4.1 Overview of risk management of systems involving structures 4
4.2 Applicability of risk assessment 6

5 Establishment of structural engineering context 6
5.1 Structural-engineering context 6
5.2 Establishment of design basis 7
5.3 Assessment of existing structures 7
5.4 Assessment of exceptional structures or extraordinary events 7
5.5 Preparation of risk information for decision 7

6 Definition of system 8
6.1 Representation of the system 8
6.2 Identification of the subsystems 8

7 Identification of hazards and consequences 8
7.1 Identification of possible hazards 8
7.2 Identification of extent of scenarios 8
7.3 Identification of consequences 8
7.4 Hazard screening 8

8 Risk estimation 9
8.1 Types of risk estimation 9
8.2 Data for estimation 10
8.3 Risk representation 10
8.4 Estimation of probability 10
8.5 Estimation of consequence 11
8.6 Risk calculation 11
8.7 Sensitivity analysis 11

9 Risk evaluation 11
9.1 Risk acceptance 11
9.2 Risk criteria 12

10 Evaluation of options for risk treatment 12
10.1 General 12
10.2 Determination of options 12
10.3 Assessment of options for risk treatment 13
10.4 Implementation of risk treatment 13
11 Report 13

Annex A (informative) Principles of risk assessment 14

Annex B (informative) Examples of extraordinary events and exceptional structures for risk assessment 18

Annex C (informative) Techniques for treatment of expert opinions 20

Annex D (informative) Examples of quantitative risk representation 23

Annex E (informative) Equations for risk estimation 27

Annex F (informative) Procedure for the estimation of consequences 31

Annex G (informative) Examples of measures for risk treatment 33

Annex H (informative) Examples of application of risk acceptance and optimization 36

Bibliography 42
