

DIN EN 15725:2010-11 (E)

Extended application reports on the fire performance of construction products and building elements

Contents		Page
Foreword		3
Introduction		4
1	Scope	5
2	Normative references	5
3	Terms and definitions	5
4	Role of extended application in the classification process	8
5	Principles of establishing the field of application	9
5.1	General	9
5.2	Direct field of application	9
5.2.1	Reaction to fire	9
5.2.2	Fire resistance	9
5.2.3	External fire exposure to roofs	9
5.3	Extended field of application	9
5.3.1	General principles	9
5.3.2	Reaction to fire	9
5.3.3	Fire resistance	10
5.3.4	External fire exposure to roofs	10
5.4	Combination of parameter variations	11
5.5	Procedure for undertaking extended application	11
6	Information to be included in an extended application report	12
Annex A (normative) Format for an extended application report Reaction to fire		14
Annex B (normative) Format for an extended application report Fire resistance		17
Annex C (normative) Format for an extended application report External fire exposure to roofs		20
Bibliography		23
