

# DIN EN 15758:2010-12 (E)

## Conservation of Cultural Property - Procedures and instruments for measuring temperatures of the air and of the surfaces of objects

---

<b>Contents</b>		<b>Page</b>
Foreword .....		3
Introduction .....		4
1	Scope .....	5
2	Normative references .....	5
3	Terms and definitions .....	5
4	Recommendations relating to measuring methods .....	8
4.1	Measurement of air temperature .....	8
4.2	Measurement of the effective temperature including radiant contribution .....	8
4.2.1	Black-globe thermometer .....	8
4.2.2	Measuring temperature with a blackbody strip target .....	8
5	Measurement of surface temperature .....	9
5.1	General .....	9
5.2	Thermometers with contact sensors .....	9
5.3	Infrared thermometers (remote temperature sensors) .....	10
5.4	Quasi-contact thermometers .....	10
6	Recommendations relating to variations in space of the thermal quantities .....	11
6.1	General .....	11
6.2	Recommendations relating to variations in time of the thermal quantities .....	11
6.3	Specifications relating to measuring instruments .....	11
7	Calibration .....	11
Annex A (normative) Characteristics of measuring instruments .....		13
Bibliography .....		14
