Foreword 3

Introduction 4

1 Scope 5

2 Normative references 5

3 Terms, definitions and symbols 6
3.1 Terms and definitions 6
3.2 Symbols 6

4 Principle 8

5 Requirements for test specimens and apparatus 14
5.1 General 14
5.2 Surround panels 14
5.3 Test specimens 14
5.4 Calibration panels 16
5.5 Temperature measurements and baffle positions 16
5.6 Air flow measurement 16

6 Test procedure 17
6.1 General 17
6.2 Calibration measurements 18
6.3 Measurement procedure for test specimens 21
6.4 Expression of results for standardized test applications 21

7 Test report 22

Annex A (normative) Environmental temperatures 23

Annex B (normative) Linear thermal transmittance of the edge zone 27

Annex C (informative) Design of calibration transfer standard 30

Annex D (informative) Example of calibration test and measurement of window specimen 34

Annex E (informative) Analytical calibration procedure using heat balance equations 43

Annex F (informative) Uncertainty analysis for hot boxes 45
