

DIN EN 13859-2:2010-11 (E)

Flexible sheets for waterproofing - Definitions and characteristics of underlays - Part 2: Underlays for walls

Contents		Page
1	Scope	5
2	Normative references	5
3	Terms and definitions	6
4	Product characteristics	7
4.1	General	7
4.2	Dimensions, straightness and mass per unit area	7
4.3	Application related characteristics	7
4.3.1	Reaction to fire	7
4.3.2	Resistance to water penetration	7
4.3.3	Water vapour transmission properties	8
4.3.4	Resistance to penetration of air	8
4.3.5	Tensile properties	8
4.3.6	Resistance to tearing	8
4.3.7	Dimensional stability	8
4.3.8	Flexibility at low temperature (pliability)	8
4.3.9	Artificial ageing behaviour	8
4.4	Dangerous substances	9
5	Testing	9
5.1	Sampling	9
5.2	Test methods	9
5.2.1	Determination of dimensions, straightness and mass per unit area	9
5.2.2	Determination of reaction to fire	9
5.2.3	Determination of resistance to water penetration Class W1	9
5.2.4	Determination of resistance to water penetration Class W2	10
5.2.5	Determination of water vapour transmission properties	10
5.2.6	Determination of resistance to penetration of air	10
5.2.7	Determination of tensile properties	10
5.2.8	Determination of resistance to tearing (nail shank)	10
5.2.9	Determination of dimensional stability	10
5.2.10	Determination of flexibility at low temperature (pliability)	10
5.2.11	Determination of resistance to artificial ageing	10
6	Evaluation of conformity	11
6.1	General	11
6.2	Initial type testing	11
6.2.1	General	11
6.2.2	Sampling	11
6.2.3	Test results	11
6.3	Factory production control (FPC)	11
6.3.1	General	11
6.3.2	Frequency of testing	12
7	Product data sheet and designation	12
8	Marking, labelling and packaging	12

Annex A (normative) Determination of tensile properties	13
A.1 General	13
A.2 Apparatus	13
A.3 Sampling	13
A.4 Preparation of test specimens	13
A.5 Procedure	13
A.6 Expression and evaluation of results	14
A.7 Test report	15
Annex B (normative) Determination of resistance to tearing	16
B.1 General	16
B.2 Apparatus	16
B.3 Sampling	16
B.4 Preparation of test specimens	16
B.5 Procedure	16
B.6 Expression and evaluation of results	17
B.7 Test report	17
Annex C (normative) Artificial ageing by exposure to UV and heat	18
C.1 General	18
C.2 Principle	18
C.3 Apparatus	18
C.3.1 Apparatus for exposure to UV-A irradiation and elevated temperature	18
C.3.2 Apparatus for exposure to heat	18
C.4 Preparation of test specimens	18
C.4.1 Dimensions of test specimens	18
C.4.2 Number of specimens	18
C.4.3 Conditioning of test specimens	19
C.5 Procedure	19
C.5.1 Exposure to UV irradiation and elevated temperature	19
C.5.2 Exposure to heat	19
C.5.3 Testing of resistance to water penetration and tensile properties after artificial ageing	19
C.6 Expression of results	19
C.7 Test report	19
Annex D (normative) Initial type test and frequencies of testing for factory production control	21
Annex E (informative) Example of a product data sheet	22
E.1 General information	22
Annex ZA (informative) Clauses of this European Standard addressing provision of the Construction Products Directive (CPD)	24
ZA.1 Scope and relevant characteristics	24
ZA.2 Procedures for attestation of conformity of underlays for walls	25
ZA.2.1 Systems of attestation of conformity	25
ZA.2.2 EC Declaration of conformity	28
ZA.3 CE marking and labelling	29
Bibliography	32
