

DIN EN 15599-2:2010-12 (E)

Thermal insulation products for building equipment and industrial installations - In-situ thermal insulation formed from expanded perlite (EP) products - Part 2: Specification for the installed products

| Contents | | Page |
|--------------------|--|-------------|
| Foreword | | 3 |
| 1 | Scope | 4 |
| 2 | Normative references | 4 |
| 3 | Terms and definitions | 4 |
| 3.1 | Definitions | 4 |
| 3.2 | Symbols and abbreviations | 5 |
| 3.2.1 | Symbols used in this part of the standard | 5 |
| 3.2.2 | Abbreviations used in this part of the standard | 5 |
| 4 | Requirements | 5 |
| 4.1 | General | 5 |
| 4.2 | Thermal resistance | 5 |
| 4.3 | Installed declared insulation thickness | 5 |
| 4.4 | Cavity fill | 6 |
| 5 | In-situ measurements | 6 |
| 5.1 | Installed declared insulation thickness | 6 |
| 5.2 | Width of cavities | 6 |
| 5.3 | Cavity fill | 6 |
| 6 | Installer's declaration | 6 |
| Bibliography | | 7 |
