

DIN EN 1997-2:2010-10 (E)

Eurocode 7: Geotechnical design - Part 2: Ground investigation and testing (includes Corrigendum AC:2010)

Contents		Page
Foreword		7
Section 1 General		10
1.1 Scope		10
1.1.1 Scope of Eurocode 7		10
1.2 Normative references		11
1.3 Assumptions		12
1.4 Distinction between Principles and Application Rules		12
1.5 Definitions		13
1.5.1 Terms common to all Eurocodes		13
1.5.2 Terms common to Eurocode 7		13
1.6 Test results and derived values		14
Section 2 Planning of ground investigations		20
2.1 Objectives		20
2.1.1 General		20
2.1.2 Ground		21
2.1.3 Construction materials		22
2.1.4 Groundwater		22
2.2 Sequence of ground investigations		22
2.3 Preliminary investigations		23
2.4 Design investigations		24
2.4.1 Field investigations		24
2.4.2 Laboratory tests		27
2.5 Controlling and monitoring		31
Section 3 Soil and rock sampling and groundwater measurements		33
3.1 General		33
3.2 Sampling by drilling		33
3.3 Sampling by excavation		33
3.4 Soil sampling		33
3.4.1 Categories of sampling methods and laboratory quality classes of samples		33
3.4.2 Soil identification		34
3.4.3 Planning of soil sampling		34
3.4.4 Handling, transport and storing of samples		35
3.5 Rock sampling		35
3.5.1 Categories of sampling methods		35
3.5.2 Rock identification		36
3.5.3 Planning of rock sampling		36
3.5.4 Handling, transport and storing of samples		37
3.6 Groundwater measurements in soils and rocks		37
3.6.1 General		37
3.6.2 Planning and execution of the measurements		37
3.6.3 Evaluation of results of groundwater measurements		38
1.8 Symbols and units		16
Section 4 Field tests in soil and rock		40

4.1	General	40
4.2	General requirements	40
4.2.1	Planning a specific test programme	40
4.2.2	Execution	41
4.2.3	Evaluation	41
4.3.1	Objectives	42
4.3.2	Specific requirements	42
4.3.3	Evaluation of test results	43
4.3.4	Use of test results and derived values	43
4.4	Pressuremeter tests (PMT)	45
4.4.1	Objectives	45
4.4.2	Specific requirements	45
4.4.3	Evaluation of test results	46
4.4.4	Use of test results and derived values	47
4.5	Flexible dilatometer test (FDT)	48
4.5.1	Objectives	48
4.5.2	Specific requirements	48
4.5.3	Evaluation of test results	48
4.5.4	Use of test results and derived values	49
4.6	Standard penetration test (SPT)	49
4.6.1	Objectives	49
4.6.2	Specific requirements	49
4.6.3	Evaluation of test results	49
4.6.4	Use of test results and derived values	50
4.7	Dynamic probing tests (DP)	51
4.7.1	Objectives	51
4.7.2	Specific requirements	52
4.7.3	Evaluation of test results	52
4.7.4	Use of test results and derived values	52
4.8	Weight sounding test (WST)	53
4.8.1	Objectives	53
4.8.2	Specific requirements	53
4.8.3	Evaluation of test results	54
4.8.4	Use of test results and derived values	54
4.9	Field vane test (FVT)	55
4.9.1	Objectives	55
4.9.2	Specific requirements	55
4.9.3	Evaluation of test results	55
4.9.4	Use of test results and derived values	56
4.10	Flat dilatometer test (DMT)	56
4.10.1	Objectives	56
4.10.2	Specific requirements	56
4.10.3	Evaluation of test results	56
4.10.4	Use of test results and derived values	57
4.11	Plate loading test (PLT)	57
4.11.1	Objectives	57
4.11.2	Specific requirements	58
4.11.3	Evaluation of test results	58
4.11.4	Use of test results and derived values	58
4.3	Cone penetration and piezocone penetration tests (CPT, ~CPTM,™ CPTU)	42
Section 5 Laboratory tests on soil and rock		60
5.1	General	60
5.2	General requirements for laboratory tests	60
5.2.1	General.....requirements	60
5.2.2	Procedures, equipment and presentation	60
5.2.3	Evaluation of test results	60
5.3	Preparation of soil specimens for testing	61
5.3.1	Objective	61
5.3.2	Requirements	61

5.4	Preparation of rock specimens for testing	62
5.4.1	Objective	62
5.4.2	Requirements	62
5.5	Tests for classification, identification and description of soil	63
5.5.1	General	63
5.5.2	Requirements for all classification tests	63
5.5.3	Water content determination	63
5.5.4	Bulk density determination	64
5.5.5	Particle density determination	64
5.5.6	Particle size analysis	64
5.5.7	Consistency limits determination	65
5.5.8	Determination of the density index of granular soil	66
5.5.9	Soil dispersibility determination	67
5.5.10	Frost susceptibility	68
5.6	Chemical testing of soil and groundwater	68
5.6.1	Requirements for all chemical tests	68
5.6.2	Organic content determination	70
5.6.3	Carbonate content determination	71
5.6.4	Sulfate content determination	71
5.6.5	pH value determination (acidity and alkalinity)	72
5.6.6	Chloride content determination	72
5.7	Strength index testing of soil	73
5.7.1	Objective	73
5.7.2	Requirements	73
5.7..3	Use of test results	3 Use of test results 73
5.8	Strength testing of soil	73
5.8.1	Objective and scope	73
5.8.2	General requirements	74
5.8.3	Evaluation and use of test results	75
5.8.4	Unconfined compression test	75
5.8.5	Unconsolidated, undrained triaxial compression test	76
5.8.6	Consolidated triaxial compression test	76
5.8.7	Consolidated direct shear box tests	77
5.9	Compressibility and deformation testing of soil	78
5.9.1	General	78
5.9.2	Oedometer compressibility testing	78
5.9.3	Triaxial deformability testing	8
5.10	Compaction testing of soil	81
5.10.1	Scope	81
5.10.2	Compaction tests	81
5.10.3	California Bearing ratio (CBR) test	81
0	5.11 Permeability testing of soil	82
5.11.1	Objective	82
5.11.2	Requirements	82
5.11.3	Evaluation and use of test results	83
5.12	Tests for classification of rocks	84
5.12.1	General	84
5.12.2	Requirements for all classification tests	84
5.12.3	Rock identification and description	84
5.12.4	Water content determination	85
5.12.5	Density and porosity determination	86
5.13	Swelling testing of rock material	86
5.13.1	General	86
5.13.2	General requirements	87
5.13.3	Evaluation of test results	87
5.13.4	Swelling pressure index under zero volume change	8
5.13.5	Swelling strain index for radially-confined specimens with axial surcharge	88
5.13.6	Swelling strain developed in unconfined rock specimen	89
5.14	Strength testing of rock material	89
5.14.1	General	89

5.14.2	Requirements for all strength tests	89
5.14.3	Evaluation of test results	90
5.14.4	Uniaxial compression and deformability test	90
5.14.5	Point load test	91
5.14.6	Direct shear test	92
5.14.7	Brazil test	93
5.14.8	Triaxial compression test	94
Section 6 Ground investigation report		95
6.1	General requirements	95
6.2	Presentation of geotechnical information	95
6.3	Evaluation of geotechnical information	96
6.4	Establishment of derived values	97
Annex A (informative) List of test results of geotechnical test standards		98
Annex B (informative) Planning of geotechnical investigations		101
Annex C (informative) Example of groundwater pressure derivations based on a model and long term measurements		109
Annex D (informative) Cone and piezocone penetration tests		111
Annex E (informative) Pressure meter test		121
Annex F (informative) Standard penetration test		125
Annex G (informative) Dynamic probing test		129
Annex H (informative) Weight sounding test 132 Annex I (informative) Field vane test		133
Annex J (informative) Flat dilatometer test Example of correlations between EOED and DMT results		138
Annex K (informative) Plate loading test		139
Annex L (informative) Detailed information on preparation of soil specimens for testing		143
Annex M (informative) Detailed information on tests for classification, identification and description of soil		150
Annex N (informative) Detailed information on chemical testing of soil		157
.....		
Annex O (informative) Detailed information on strength index testing of soil		162
Annex P (informative) Detailed information on strength testing of soil		163
Annex Q (informative) Detailed information on compressibility testing of soil		165
Annex R (informative) Detailed information on compaction testing of soil		166
Annex S (informative) Detailed information on permeability testing of soil		168
Annex T (informative) Preparation of specimen for testing on rockmaterial		170
Annex U (informative) Classification testing of rock material		171
Annex V (informative) Swelling testing of rock material		173
Annex W (informative) Strength testing of rock material		175
Annex X (informative) Bibliography		180
