Foreword 4

1 General 10
1.1 Scope 10
1.1.1 Scope of EN 1999 10
1.2 Normative references 11
1.3 Assumptions 11
1.4 Distinction between principles and application rules 11
1.5 Terms and definitions 12
1.5.1 Special terms relating to design in general 12
1.5.2 Terms relating to thermal actions 12
1.5.3 Terms relating to material and products 12
1.5.4 Terms relating to heat transfer analysis 12
1.5.5 Terms relating to mechanical behaviour analysis 13
1.6 Symbols 13

2 Basis of design 15
2.1 Requirements 15
2.1.1 Basic requirements 15
2.1.2 Nominal fire exposure 15
2.1.3 Parametric fire exposure 16
2.2 Actions 16
2.3 Design values of material properties 16
2.4 Verification methods 16
2.4.1 General 16
2.4.2 Member analysis 17
2.4.3 Analysis of part of the structure 18
2.4.4 Global structural analysis 19

3 Material 19
3.1 General 19
3.2 Mechanical properties of aluminium alloys 19
3.2.1 Strength and deformation properties 19
3.2.2 Unit mass 22
3.3 Thermal properties 22
3.3.1 Aluminium alloys 22
3.3.2 Fire protection materials 24

4 Structural fire design 24
4.1 General 24
4.2 Simple calculation models 25
4.2.1 General 25
4.2.2 Resistance 25
4.2.3 Aluminium temperature development 28
4.3 Advanced calculation models 34
4.3.1 General 34
4.3.2 Thermal response 35
4.3.3 Mechanical response 35
4.3.4 Validation of advanced calculation models 36

Annex A (informative) Properties of aluminium alloys and/or tempers not listed in EN 1999-1-1 37

Annex B (informative) Heat transfer to external structural aluminium members 38
B.1 General 38
B.1.1 Basis 38
B.1.2 Conventions for dimensions 38
B.1.3 Heat balance 38
B.1.4 Overall configuration factors 40
B.2 Column not engulfed in flame 41
B.2.1 Radiative heat transfer 41
B.2.2 Flame emissivity 42
B.2.3 Flame temperature 46
B.2.4 Flame absorptivity 47
B.3 Beam not engulfed in flame 47
B.3.1 Radiative heat transfer 47
B.3.2 Flame emissivity 49
B.3.3 Flame temperature 50
B.3.4 Flame absorptivity 50
B.4 Column engulfed in flame 50
B.5 Beam fully or partially engulfed in flame 53
B.5.1 Radiative heat transfer 53
B.5.2 Flame emissivity 57
B.5.3 Flame absorptivity 57
