DIN EN 1996-3:2010-12 (E)

Eurocode 6: Design of masonry structures - Part 3: Simplified calculation methods for unreinforced mas onry structures (includes Corrigendum AC:2009)

Contents

Page

Foreword 4

Background of the Eurocode programme 4

Status and field of application of Eurocodes 5

National Standards implementing Eurocodes 6

Links between Eurocodes and harmonised technical specifications (ENs and ETAs) for products 6

1 General 8
1.1 Scope Part 3 of Eurocode 6 8
1.2 Normative references 8
1.3 Assumptions 8
1.4 Distinction between Principles and Application Rules 8
1.5 Definitions 9
1.5.1 General 9
1.5.2 Masonry 9
1.6 Symbols 9

2 Basis of design 10
2.1 General 10
2.2 Basic variables 10
2.3 Verification by the partial factor method 10

3 Materials 11
3.1 General 11
3.2 Characteristic compressive strength of masonry 11
3.3 Characteristic flexural strength of masonry 11
3.4 Characteristic initial shear strength of masonry 11

4 Design of unreinforced masonry walls using simplified calculation methods 12
4.1 General 12
4.2 Simplified calculation method for walls subjected to vertical and wind loading 12
4.2.1 Conditions for application 12
4.2.2 Determination of design vertical load resistance of a wall 15
4.3 Simplified calculation method for walls subjected to concentrated loads 18
4.4 Simplified calculation method for shear walls 19
4.4.1 Verification of shear resistance of walls 19
4.4.2 Design shear resistance 20
4.5 Simplified calculation method for basement walls subject to lateral earth pressure 21
4.6 Simplified calculation method for the design of walls subjected to limited lateral load but no vertical loads 22
4.7 Simplified calculation method for the design of walls subjected to uniform lateral load but no vertical loads 22

Annex A (informative) Simplified calculation method for unreinforced masonry walls of buildings not greater than 3 storeys 23

Annex B (normative) Simplified calculation method for the design of internal walls not subject to vertical loads and with limited lateral load 26

Annex C (informative) Simplified calculation method for the design of walls subjected to uniform lateral design load and no vertical loads 30

Annex D (normative) Simplified method of determining the characteristic strength of masonry 35
