

# DIN EN 1996-3:2010-12 (E)

## Eurocode 6: Design of masonry structures - Part 3: Simplified calculation methods for unreinforced masonry structures (includes Corrigendum AC:2009)

---

<b>Contents</b>		<b>Page</b>
Foreword .....		4
Background of the Eurocode programme .....		4
Status and field of application of Eurocodes .....		5
National Standards implementing Eurocodes .....		6
Links between Eurocodes and harmonised technical specifications (ENs and ETAs) for products .....		6
<b>1</b>	<b>General .....</b>	<b>8</b>
1.1	Scope Part 3 of Eurocode 6 .....	8
1.2	Normative references .....	8
1.3	Assumptions .....	8
1.4	Distinction between Principles and Application Rules .....	8
1.5	Definitions .....	9
1.5.1	General .....	9
1.5.2	Masonry .....	9
1.6	Symbols .....	9
<b>2</b>	<b>Basis of design .....</b>	<b>10</b>
2.1	General .....	10
2.2	Basic variables .....	10
2.3	Verification by the partial factor method .....	10
<b>3</b>	<b>Materials .....</b>	<b>11</b>
3.1	General .....	11
3.2	Characteristic compressive strength of masonry .....	11
3.3	Characteristic flexural strength of masonry .....	11
3.4	Characteristic initial shear strength of masonry .....	11
<b>4</b>	<b>Design of unreinforced masonry walls using simplified calculation methods .....</b>	<b>12</b>
4.1	General .....	12
4.2	Simplified calculation method for walls subjected to vertical and wind loading .....	12
4.2.1	Conditions for application .....	12
4.2.2	Determination of design vertical load resistance of a wall .....	15
4.3	Simplified calculation method for walls subjected to concentrated loads .....	18
4.4	Simplified calculation method for shear walls .....	19
4.4.1	Verification of shear resistance of walls .....	19
4.4.2	Design shear resistance .....	20
4.5	Simplified calculation method for basement walls subject to lateral earth pressure .....	21
4.6	Simplified calculation method for the design of walls subjected to limited lateral load but no vertical loads .....	22
4.7	Simplified calculation method for the design of walls subjected to uniform lateral load but no vertical loads .....	22
<b>Annex A (informative)</b>	<b>Simplified calculation method for unreinforced masonry walls of buildings not greater than 3 storeys .....</b>	<b>23</b>
<b>Annex B (normative)</b>	<b>Simplified calculation method for the design of internal walls not subject to vertical loads and with limited lateral load .....</b>	<b>26</b>

<b>Annex C (informative) Simplified calculation method for the design of walls subjected to uniform lateral design load and no vertical loads .....</b>	<b>30</b>
<b>Annex D (normative) Simplified method of determining the characteristic strength of masonry .....</b>	<b>35</b>
