

DIN EN 1996-3:2010-12 (E)

Eurocode 6: Design of masonry structures - Part 3: Simplified calculation methods for unreinforced masonry structures (includes Corrigendum AC:2009)

Contents	Page
Foreword	4
Background of the Eurocode programme	4
Status and field of application of Eurocodes	5
National Standards implementing Eurocodes	6
Links between Eurocodes and harmonised technical specifications (ENs and ETAs) for products	6
1 General	8
1.1 Scope Part 3 of Eurocode 6	8
1.2 Normative references	8
1.3 Assumptions	8
1.4 Distinction between Principles and Application Rules	8
1.5 Definitions	9
1.5.1 General	9
1.5.2 Masonry	9
1.6 Symbols	9
2 Basis of design	10
2.1 General	10
2.2 Basic variables	10
2.3 Verification by the partial factor method	10
3 Materials	11
3.1 General	11
3.2 Characteristic compressive strength of masonry	11
3.3 Characteristic flexural strength of masonry	11
3.4 Characteristic initial shear strength of masonry	11
4 Design of unreinforced masonry walls using simplified calculation methods	12
4.1 General	12
4.2 Simplified calculation method for walls subjected to vertical and wind loading	12
4.2.1 Conditions for application	12
4.2.2 Determination of design vertical load resistance of a wall	15
4.3 Simplified calculation method for walls subjected to concentrated loads	18
4.4 Simplified calculation method for shear walls	19
4.4.1 Verification of shear resistance of walls	19
4.4.2 Design shear resistance	20
4.5 Simplified calculation method for basement walls subject to lateral earth pressure	21
4.6 Simplified calculation method for the design of walls subjected to limited lateral load but no vertical loads	22
4.7 Simplified calculation method for the design of walls subjected to uniform lateral load but no vertical loads	22
Annex A (informative) Simplified calculation method for unreinforced masonry walls of buildings not greater than 3 storeys	23
Annex B (normative) Simplified calculation method for the design of internal walls not subject to vertical loads and with limited lateral load	26

Annex C (informative) Simplified calculation method for the design of walls subjected to uniform lateral design load and no vertical loads	30
Annex D (normative) Simplified method of determining the characteristic strength of masonry	35
