Foreword 4

1 General 9
1.1 Scope 9
1.2 Normative references 9
1.3 Assumptions 10
1.4 Distinction between principles and application rules 10
1.5 Terms and definitions 10
1.6 Symbols 11
1.7 Convention for cross section axes 12

2 Basis of design 13
2.1 Requirements 13
2.2 Principles of limit state design 14
2.3 Actions and environmental influences 14
2.4 Ultimate limit state verifications 15
2.5 Design assisted by testing 15
2.6 Durability 15

3 Materials 16
3.1 Structural steel 16
3.2 Connections 16
3.3 Guys and fittings 16

4 Durability 16
4.1 Allowance for corrosion 16
4.2 Guys 16

5 Structural analysis 17
5.1 Modelling for determining action effects 17
5.2 Modelling of connections 17

6 Ultimate limit states 18
6.1 General 18
6.2 Resistance of cross sections 18
6.3 Resistance of members 18
6.4 Connections 20
6.5 Special connections for masts 21

7 Serviceability limit states 23
7.1 Basis 23
7.2 Deflections and rotations 23
7.3 Vibrations 23

8 Design assisted by testing 24

9 Fatigue 24
9.1 General 24
9.2 Fatigue loading 24
9.3 Fatigue resistance 25
9.4 Safety assessment 25

9.5 Partial factors for fatigue 25
9.6 Fatigue of guys 25

Annex A [normative] - Reliability differentiation and partial factors for actions 26

A.1 Reliability differentiation for masts and towers 26
A.2 Partial factors for actions 26

Annex B [informative] - Modelling of meteorological actions 27

B.1 General 27
B.2 Wind force 28
B.3 Response of lattice towers 39
B.4 Response of guyed masts 44

Annex C [informative] - Ice loading and combinations of ice with wind 52

C.1 General 52
C.2 Ice loading 52
C.3 Ice weight 53
C.4 Wind and ice 53
C.5 Asymmetric ice load 53
C.6 Combinations of ice and wind 54

Annex D [normative] - Guys, dampers, insulators, ancillaries and other items 55

D.1 Guys 55
D.2 Dampers 55
D.3 Insulators 56
D.4 Ancillaries and other items 56

Annex E [informative] - Guy rupture 58

E.1 Introduction 58
E.2 Simplified analytical model 58
E.3 Conservative procedure 59
E.4 Analysis after a guy rupture 60

Annex F [informative] - Execution 61

F.1 General 61
F.2 Bolted connections 61
F.3 Welded connections 61
F.4 Tolerances 61
F.5 Prestretching of guys 62

Annex G [informative] - Buckling of components of masts and towers 63

G.1 Buckling resistance of compression members 63
G.2 Effective slenderness factor k 63

Annex H [informative] - Buckling length and slenderness of members 69

H.1 General 69
H.2 Leg members 69
H.3 Bracing members 70
H.4 Secondary bracing members 77
H.5 Shell structures 78
