

ISO 17123-1:2010-10 (E)

Optics and optical instruments - Field procedures for testing geodetic and surveying instruments - Part 1: Theory

Contents		Page
Foreword		iv
Introduction		v
1	Scope	1
2	Normative references	1
3	Terms and definitions	1
3.1	General metrological terms	1
3.2	Terms specific to this International Standard	3
3.3	The term "uncertainty"	5
3.4	Symbols	7
4	Evaluating uncertainty of measurement	8
4.1	General	8
4.2	Type A evaluation of standard uncertainty	9
4.3	Type B evaluation of standard uncertainty	16
4.4	Law of propagation of uncertainty and combined standard uncertainty	18
4.5	Expanded uncertainty	19
5	Reporting uncertainty	20
6	Summarized concept of uncertainty evaluation	20
7	Statistical tests	21
7.1	General	21
7.2	Question a): is the experimental standard deviation, s , smaller than or equal to a given value ?	21
7.3	Question b): Do two samples belong to the same population?	22
7.4	Question c) [respectively question d)]: Testing the significance of a parameter y_k	22
Annex A (informative)	Probability distributions	24
Annex B (normative)	distribution, Fisher's distribution and Student's t-distribution	25
Annex C (informative)	Examples	26
Bibliography		35
