DIN EN ISO 23993:2011-02 (E)

Thermal insulation products for building equipment and industrial install ations - Determination of design thermal conductivity (ISO 23993:2008, Corrected version 2009-10-01)

Contents

Page

Foreword 3

Introduction 5

1 Scope 6

2 Normative references 6

3 Terms and definitions 6

4 Symbols 7

5 Determination of declared thermal conductivity 7

6 Determination of the design value of thermal conductivity 8

7 Conversion of available data 8
7.1 General 8
7.2 Conversion factor for temperature difference 9
7.3 Conversion factor for moisture 9
7.4 Conversion factor for ageing 10
7.5 Conversion factor for compression 10
7.6 Conversion factor for convection 10
7.7 Conversion factor for thickness effect 10
7.8 Conversion factor for regular joints 10
7.9 Additional thermal conductivity for regularly insulation-related thermal bridges, e.g. spacers 11

Annex A (normative) Conversion factors 13

Annex B (informative) Examples of determination of the design thermal conductivity 25

Annex C (informative) Approximate values of conversion factors 28

Bibliography 36
