DIN EN 15080-12:2011-04 (E)

Extended application of results from fire resistance tests - Part 12: Loadbearing masonry walls

Contents

Page

Foreword 3

1 Scope 4

2 Normative references 4

3 Terms and definitions 5

4 General principles 5
4.1 General 5
4.2 Classifications 6
4.3 Necessary additional information 6

5 Rules for extended application 7
5.1 Units 7
5.2 Masonry mortars and joints 9
5.3 Plaster, rendering or external covering 9
5.4 Load Level 10
5.5 Geometrical parameters 10

6 Report of the extended application analysis 11

Annex A (informative) Examples of extended applications for loadbearing masonry walls 12

A.1 Basis for the Definition: Test report according to EN 1365-1 (add photo) 12
A.2 Material Properties from Report: 12
A.2.1 Units 12
A.2.2 Mortar 12
A.2.3 Plaster or rendering 12
A.3 Load 12
A.4 Test results: 13
A.5.1 Units 13
A.5.2 Masonry mortar: 14
A.5.3 Plaster or rendering 14
A.5.4 Load level 14
A.5.5 Geometrical parameters 14

Annex B (informative) Recommendations for the installation 15

B.1 Connection systems for REI walls 15
B.2 Recesses and chases 15
