DIN EN 410:2011-04 (E)

Glass in building - Determination of luminous and solar characteristics of glazing

Contents

Page

Foreword 3

Introduction 4

1 Scope 5

2 Normative references 5

3 Terms and definitions 5

4 Symbols 6

5 Determination of characteristics 8
5.1 General 8
5.2 Light transmittance 8
5.3 Light reflectance 11
5.4 Total solar energy transmittance (solar factor) 12
5.4.1 Calculation 12
5.4.2 Division of incident solar radiant flux 12
5.4.3 Solar direct transmittance 14
5.4.4 Solar direct reflectance 14
5.4.5 Solar direct absorptance 14
5.4.6 Secondary heat transfer factor towards the inside 14
5.5 UV-transmittance 19
5.6 Colour rendering 19
5.7 Shading coefficient 22

6 Expression of results 23

7 Test report 23

Annex A (normative) Procedures for calculation of the spectral characteristics of glass plates with a different thickness and/or colour 33

Annex B (normative) Procedure for calculation of the spectral characteristics of laminated glass 38

Annex C (informative) Procedure for calculation of the spectral characteristics of screen printed glass 59

Annex D (informative) Example of calculation of colour rendering index 60

Bibliography 64
