

DIN EN 410:2011-04 (E)

Glass in building - Determination of luminous and solar characteristics of glazing

Contents		Page
Foreword		3
Introduction		4
1 Scope		5
2 Normative references		5
3 Terms and definitions		5
4 Symbols		6
5 Determination of characteristics		8
5.1 General		8
5.2 Light transmittance		8
5.3 Light reflectance		11
5.4 Total solar energy transmittance (solar factor)		12
5.4.1 Calculation		12
5.4.2 Division of incident solar radiant flux		12
5.4.3 Solar direct transmittance		14
5.4.4 Solar direct reflectance		14
5.4.5 Solar direct absorptance		14
5.4.6 Secondary heat transfer factor towards the inside		14
5.5 UV-transmittance		19
5.6 Colour rendering		19
5.7 Shading coefficient		22
6 Expression of results		23
7 Test report		23
Annex A (normative) Procedures for calculation of the spectral characteristics of glass plates with a different thickness and/or colour		33
Annex B (normative) Procedure for calculation of the spectral characteristics of laminated glass		38
Annex C (informative) Procedure for calculation of the spectral characteristics of screen printed glass		59
Annex D (informative) Example of calculation of colour rendering index		60
Bibliography		64
