Foreword 3

1 Scope 4

2 Normative references 4

3 Terms and definitions 4

4 Safety 5

5 Principle 5

6 Test equipment 5

7 Calibration 12

8 Additional items required for testing 12

9 Test measurements 12
9.1 Measurements in the field 12
9.2 Measurements in the laboratory 13

10 Field sampling 13

11 Test procedure 13

12 Calculations 15

13 Precision 16

14 Test report 17

Annex A (normative) Validation and Calibration of the pendulum friction tester 18

A.1 Validation of the performance of the Pendulum Tester 18
A.1.1 General 18
A.1.2 Procedure 18
A.1.3 Checking for error 19
A.2 Preparation of a new slider 19
A.2.1 General 19
A.2.2 Preparation of a new slider 20
A.2.3 Re-preparation of a used slider 20
A.3 Calibration of the pendulum friction tester 20
A.3.1 General 20
A.3.2 Pre-calibration verification 20
A.3.3 Checking/setting the centre of gravity of the pendulum arm and slider assembly 21
A.3.4 Distance of centre of gravity to centre of rotation 22
A.3.5 Checking/setting the effective spring tension 22
A.3.6 Checking/setting the slider force/deflection characteristics 24
A.3.7 Checking/setting the levelness of the frame 27
A.3.8 Final calibration 28

A.3.9 Calibration report and marking (external calibration) 28

Annex B (informative) Details of scales 29

Annex C (informative) Typical test report 31
