

DIN EN 13036-4:2011-12 (E)

Road and airfield surface characteristics - Test methods - Part 4: Method for measurement of slip/skid resistance of a surface - The pendulum test

Contents		Page
Foreword		3
1	Scope	4
2	Normative references	4
3	Terms and definitions	4
4	Safety	5
5	Principle	5
6	Test equipment	5
7	Calibration	12
8	Additional items required for testing	12
9	Test measurements	12
9.1	Measurements in the field	12
9.2	Measurements in the laboratory	13
10	Field sampling	13
11	Test procedure	13
12	Calculations	15
13	Precision	16
14	Test report	17
Annex A (normative) Validation and Calibration of the pendulum friction tester		18
A.1	Validation of the performance of the Pendulum Tester	18
A.1.1	General	18
A.1.2	Procedure	18
A.1.3	Checking for error	19
A.2	Preparation of a new slider	19
A.2.1	General	19
A.2.2	Preparation of a new slider	20
A.2.3	Re-preparation of a used slider	20
A.3	Calibration of the pendulum friction tester	20
A.3.1	General	20
A.3.2	Pre-calibration verification	20
A.3.3	Checking/setting the centre of gravity of the pendulum arm and slider assembly	21
A.3.4	Distance of centre of gravity to centre of rotation	22
A.3.5	Checking/setting the effective spring tension	22
A.3.6	Checking/setting the slider force/deflection characteristics	24
A.3.7	Checking/setting the levelness of the frame	27
A.3.8	Final calibration	28

A.3.9	Calibration report and marking (external calibration)	28
Annex B (informative)	Details of scales	29
Annex C (informative)	Typical test report	31
Bibliography	32
