

DIN EN 15643-3:2012-04 (E)

Sustainability of construction works - Assessment of buildings - Part 3: Framework for the assessment of social performance

Contents		Page
Foreword		3
Introduction		4
1	Scope	7
2	Normative references	8
3	Terms and definitions	8
4	Principles	14
4.1	General	14
4.2	Objectives of social performance assessment of the building	15
4.3	Relevance of technical and functional requirements	15
4.4	Consideration of the building life cycle	15
5	Requirements for assessment methods	16
5.1	General	16
5.2	Object of assessment and the system boundary	16
5.3	Functional equivalent	16
5.4	Type of data and data allocation in the assessment of social performance	17
5.4.1	Assignment of data to the building life cycle	17
5.4.2	Types of data	17
5.4.3	Scenarios	18
5.4.4	Other information	18
5.5	Requirements for data quality in the assessment of social performance	18
5.6	Requirements for verification	18
5.7	Transparency of the assessment methods	18
5.8	Requirements for communication	19
5.8.1	General	19
5.8.2	The results of the assessments	19
5.8.3	Functional equivalent in communication	20
5.8.4	Social performance requirements from client's brief and/or regulations	20
5.8.5	Technical and functional performance	21
6	Requirements for assessment methods of social performance of buildings	21
6.1	Overview of the methodology for assessment of social performance of buildings	21
6.2	Social performance categories, aspects and indicators	22
6.2.1	General	22
6.2.2	Categories for social aspects and impacts	22
Annex A (informative) Work programme of CEN/TC 350		25
A.1	Work programme of CEN/TC 350	25
Annex B (informative) Social Aspects in the Life cycle stages of construction works		26
