# DIN EN 12697-26:2012-06 (E)

## Bituminous mixtures - Test methods for hot mix asphalt - Part 26: Stiffness

## Contents

Page

Foreword ..... 4

1 Scope ..... 7

2 Normative references ..... 7

3 Terms, definitions and symbols ..... 7
3.1 Terms and definitions ..... 7
3.2 Symbols ..... 9

4 Principle ..... 10

5 Sample preparation ..... 10
5.1 Age of the specimens ..... 10
5.2 Drying of the specimen ..... 10
5.3 Dimensions and bulk density of the specimens ..... 10
5.4 Temperature of the specimen before testing ..... 10
5.5 Number of test specimens ..... 10

6 Checking of the testing equipment ..... 10

7 Test methods ..... 11
7.1 General ..... 11
7.2 Tests with sinusoidal or pulse loading ..... 11
7.3 Controlled strain rate loading ..... 12

8 Temperatures ..... 13

9 Expression of results ..... 14

10 Test report ..... 16
10.1 General ..... 16
10.2 Information on specimen ..... 16
10.3 Information on test method ..... 17
10.4 Information on the test and results ..... 17
10.5 Optional information ..... 17

11 Precision ..... 17

Annex A (normative) Two point bending test on trapezoidal specimens (2PB-TR) or on prismatic specimens (2PB-PR) ..... 18

A.1 Principle ..... 18
A.2 Equipment ..... 18
A.3 Specimen preparation ..... 19
A.4 Procedure ..... 20

Annex B (normative) Three point bending test on prismatic specimens (3PB-PR) and four point bending test on prismatic specimens (4PB-PR) ..... 21

B.1 Principle ..... 21
B.2 Equipment ..... 22

B.3 Specimen preparation ..... 23
B.4 Procedure ..... 23

Annex C (normative) Test applying indirect tension to cylindrical specimens (IT-CY) ..... 25

C.1 Principle ..... 25
C.2 Equipment ..... 25
C.3 Specimen preparation ..... 30
C.4 Mode of operation ..... 31

Annex D (normative) Direct tension-compression test on cylindrical specimens (DTC-CY) ..... 33

D.1 Principle ..... 33
D.2 Equipment ..... 33
D.3 Specimen preparation ..... 33
D.4 Mode of operation ..... 34

Annex E (normative) Test applying direct tension to cylindrical specimens (DT-CY) or to prismatic specimens (DT-PR) ..... 36

E.1 Principle ..... 36
E.2 Equipment ..... 36
E.3 Specimen preparation ..... 36
E.4 Mode of operation ..... 37
E.5 Derivation of the master-curve ..... 38
E.6 Determination of the stiffness modulus for the fixed loading time ..... 41

Annex F (normative) Test applying Cyclic indirect tension to cylindrical specimens (CIT-CY) ..... 42

F.1 Principle ..... 42
F.2 Equipment ..... 42
F.3 Specimen preparation ..... 44
F.4 Mode of operation ..... 45

Annex G (informative) Derivation of the master curve ..... 47

G.1 Principle ..... 47
G.2 Theoretical background ..... 48
G.3 Experimental data ..... 49
G.4 Test report ..... 50
